PREFACE

THIS New Guide, like the Guide of 1917 upon which it is based, is planned to serve a double purpose—(1) to provide a text-book for the student who, either independently, or in library school, library training class or college class in bibliography, is beginning a systematic study of reference books, and (2) to furnish a reference manual for the library assistant, research worker, or other user of library resources who needs a finger post to point out the reference tools available for some particular investigation. The needs of the two types of users have influenced different parts of the book. The demands of the second type have made the manual more comprehensive than it might perhaps have been if intended for a school text-book only, while the needs of the library school student have been kept particularly in mind in the annotations. Both types of users will, it is hoped, be helped by the detailed index of authors, titles, subjects and analytical references.

The history of the present work is already known to those who have used the Guide of 1917. The American Library Association published, in 1902, a *Guide to the study and use of reference books*, by Alice Bertha Kroeger. This book, which was the outgrowth of Miss Kroeger's long and successful experience in teaching reference work in the Drexel Institute Library School was, both because of its intrinsic worth and because it met an urgent need, immediately successful, and in practically all library schools in America was soon adopted as a regular text-book. Annual supplements for 1903-07 were printed in the *Library journal*, and in the fall of 1908 a second edition, revised and considerably enlarged, was issued. Miss Kroeger was planning to continue, along ever broadening lines, the manual which had by that time become the recognized text-book of the subject, when her work was cut short by her sudden death in the fall of 1909. All users of her book know how much she did for the advancement of the study and teaching of reference work, but only those, who, like the present writer, have had experience in that type of compilation can realize the immense amount of work which the making of her Guide had entailed.

In 1910 the Publishing Board of the American Library Association asked the present writer to continue the Guide by the preparation first of supplements to the 1908 edition and eventually of an entirely new edition. Two pamphlet supplements for 1909-10 and 1911-13 were published by the American Library Association, seven informal annual supplements for 1910-16 were printed in the *Library Journal*, and in 1917 a third entirely revised and much enlarged edition of the whole work was published. The passage of time and the many new questions and needs raised by the European War, then in its third year, had necessitated an unusually thorough revision; and the resulting third edition, while following the earlier form, was so changed in essentials as to be practically a new work. A new selection of titles was made, numerous items being eliminated and many new titles and some whole new lists and sections added, and forms of entry, imprint and collation were revised in many respects to bring the work more in line with the Library of Congress practice. In addition, the critical annotations, with some few exceptions, were entirely rewritten and greatly extended. The *New Guide* is based upon that third edition, with revision throughout and the addition of much new material. The total number of titles listed is now about 2100.

In the *New Guide* the general form and arrangement of its predecessors, familiar to library school students through years of use, has been followed with some changes in headings and classification and with the addition of new sections, sub-sections and lists, notably in the large classes of General Encyclopedias, Biography, Geography and History, where new sections for European and Latin American countries have been added,—the latter with reference to the growing importance of information about Latin America. In the class of National Bibliography, lists for thirteen additional countries have been given on the same general lines as the American, English, French and German lists included in the earlier Guide. The number of new titles added throughout amounts to more than 500, without counting the new editions and continuations of works previously listed.

War and after-war conditions have affected reference publications in many ways, and an enormous amount of checking and revision has been necessary to catch changes in title, publisher, editor, etc., as well as cases of suspended, discontinued or revived publication. Prices have been checked carefully throughout and are given on the following basis: (1) for American and English publications the prices are, in the main, those of the 1921 *Publishers' Trade List Annual* and the 1920 *Reference Catalogue of Current Literature*, supplemented by information from the *Cumulative Book Index* and *Publishers Circular* for later publications; (2) for books published elsewhere than in the United States and Great Britain

the prices listed in the trade bibliography of the country of issue *at the time of publication* are used in most cases and no attempt has been made to record subsequent fluctuations in price. Foreign book prices are now so uncertain and so many factors besides list price determine the final cost of a book that the actual price to be paid at any given time must usually be ascertained by quotation from publisher or dealer. The list prices are given, however, as supplying some kind of relative information. In the case of annuals and current periodicals only the price of the latest volume is given. In the main the inclusion of new titles, editions, etc., goes to the spring of 1922, but in a few cases, where it has been practicable to do so, later information has been added as the work has been going through the press. Forms of entry now follow Library of Congress practice in most cases where printed cards were available, though occasional changes have been made, usually in the direction of economy of printing.

The compiler extends grateful acknowledgment for the helpful suggestions received from many users of the 1917 Guide. Special acknowledgment should be made to Mr. James Ingersoll Wyer, Director of the New York State Library School, Miss Mary Emogene Hazeltine, Preceptor, Library School of the University of Wisconsin, and Miss Mary L. Sutliff, instructor in reference work in the Library School of the New York Public Library, for suggestions based upon their use of the Guide as a textbook; to Professor W. W. Rockwell of the Union Theological Seminary for the suggestion of many titles in the fields of theology and church history; to Mr. Frederick C. Hicks, Law Librarian, Columbia University, for advice about the list of law reference books; and to Mr. Peter H. Goldsmith, Editor of *Inter-America* and Director of the Inter-American Division of the American Association for International Conciliation, for advice on the selection of Latin American material. To her colleagues on the reference staff of the Columbia University Library the compiler wishes to express hearty thanks for the many ways in which they have aided in her work.

INTRODUCTION

REFERENCE DEPARTMENT

The Reference Department of a library is that part of the system which is charged especially with the task of aiding readers in their use of the library, particularly in their use of the resources and books within the library walls as distinguished from the withdrawal of books for home reading. In a large library such a department will have its own staff, often of considerable size, with a chief reference librarian, several reference assistants, often with specialized work, minor desk attendants, pages, etc. In a somewhat smaller library one trained reference assistant may handle the whole work, while in the still smaller library all reference work may have to be done by the librarian or a general assistant. Whatever the size of the library, it will have questions of one sort or another brought to it by its readers and these must be answered in as far as the resources of the library permit. Much of the reputation of the library in its community will depend upon the success with which it handles its reference questions.

Reference work is often spoken of as if it consisted only of the actual use of reference books in answering questions for readers. In its widest and best development, however, the work of a reference department covers everything necessary to help the reader in his inquiries, including the selection of an adequate and suitable collection of reference books, the arrangement and maintenance of the collection in such a way that it can be used easily and conveniently, the making of such files, indexes and clipping collections as are needed to supplement the library catalog and the book collection, the training of a capable staff of reference assistants and their supervision in such a way as to insure skillful and pleasant service and good team work, the provision of posted signs, printed directions, lists and bulletins to help the reader who can profit by such guides, expert aid in the use of the catalog and other records, suggestions as to books to be used for special purposes, instruction of individuals, groups, or classes in the use of reference books and reference methods, and constant work in answering individual questions, in helping individual readers to find some elusive fact, or in correcting some wrong method of research on the part of an inexperienced reader. While a large part of this work will be administrative and advisory, with the purpose of helping the reader to help himself, there will always be included, also, a considerable amount of actual research work in looking up questions, both those that come in by mail or telephone, and those which readers, even with some advice and assistance, have found too difficult. A live reference department is not limited to work within its own walls, but through inter-library loan, telephone reference work, knowledge of outside specialists—either individuals, institutions or learned societies, government or public service bureaus, etc.—from whom help can be obtained, can often open up many profitable sources of information to its readers and investigators. In libraries connected with educational institutions, either colleges and universities or secondary schools, the work of the reference department will often include a regular course of lectures and class work on the use of books and libraries. Such a course, especially if it is a required course for freshman or other beginning students, not merely an elective course for advanced students, can be of great assistance in increasing the intelligent and effective use of library resources.

However varied the work of a reference department may be, the reference book is the basis of its work. The most important element in the equipment of such a department is an adequate and live collection of reference books and the most important asset of a reference assistant is a knowledge of reference books and experience in using the right book at the right time and in the right way. The possession of the right books and the knowledge of how to use them are two things essential to the success of a reference department, and the latter is no less important than the former. The ignorant assistant can render comparatively useless the finest collection of reference books, while the skilled assistant who knows how to get from each book all the varied kinds of information that it is planned to give, can show astonishing results even when limited to only a few basic books.

REFERENCE BOOKS

From the point of view of use, books may be divided into two groups: those which are meant to be read through for either information or enjoyment, and those which are meant to be consulted or referred to for some definite piece of information. Books of this second class are called reference books, and are usually comprehensive in scope,

condensed in treatment and arranged on some special plan to facilitate the ready and accurate finding of information. This special arrangement may be alphabetic, as in the case of most dictionaries or encyclopedias; chronological, as in historical outlines and similar compends; tabular, as in the case of statistical abstracts; regional, as in atlases; classified or systematic as in the case of some bibliographies, technical handbooks, etc. As such books are used for the finding of single definite facts, some alphabetical approach to the fact is usually needed, and if the book is not itself arranged alphabetically it is usually provided with a detailed alphabetical index. Works which follow any of these indicated arrangements are reference books, pure and simple, and are not used for consecutive reading. There are other books, however, which, while intended primarily to be read through for either information or pleasure, are so comprehensive and accurate in their treatment and so well provided with indexes that they serve also as reference books. Examples of such books are the "Cambridge History of American Literature," anthologies such as Stevenson's "Home Book of Verse," standard histories such as the "Cambridge Modern History," and many of the text-books and treatises used in college work. The reference department of a large library will necessarily contain both formal reference books and those "borderland" books as well, but the student of reference books will naturally devote most of his attention to the formal reference books, both because they are fundamental and because they need careful study before all their uses can be learned. Later, however, in doing actual reference work, he should realize that the formal reference books constitute only a part, though a very important one, of his collection of reference material and that the treatment of some reference questions will involve first the use of some standard reference book in the reference collection, then reference from that to some book in the stack to which the formal reference book has furnished a clue, or even to some source of information outside the library.

HOW TO STUDY REFERENCE BOOKS

Only constant and practical use of a reference book will make a student thoroughly familiar with its character and use, but the following suggestions will help him in his preliminary examination of the book.

1. Examine title page carefully for information as to (a) scope of work as indicated in title, (b) author's name, (c) author's previous record (often indicated by list of degrees, positions, titles of earlier works, etc.), (d) publisher, (e) date of publication. Check date of publication by reference to copyright date and date of preface.
2. Read preface or introduction for (a) further information as to scope of work, (b) special features claimed, (c) limitations, if any, (d) comparison with other books on same subject.
3. Examine book itself for (a) arrangement, (b) kind of entry, (c) cross-references, i. e., extent to which included, whether given in main work or in separate list, etc., (d) supplementary lists, noting number and kind and how connected with main work, (e) indexes, noting fullness and exactness of reference, (f) quality and kind of articles, noting whether they are popular or scientific, signed or unsigned, impartial or biased, and especially whether they are equipped with satisfactory bibliographical references in the form of either appended bibliographies, references throughout the text or bibliographical footnotes. Several articles should be read carefully, and compared with similar articles in other books. The student should, if possible, look up subjects upon which he has some special information.
4. In examining both preface and articles note any evidence of lack of impartiality; e. g., if the book deals with a controversial subject, religious, political, etc., does it represent only one side; or, in the case of a biographical work, is the selection of names, kind and length of article, etc., determined in any way by the desire to secure subscribers.
5. In examining the arrangement of a book, note the possibility of variation in books which follow the same general arrangement; e. g., in a work arranged alphabetically, note what rules for alphabetizing have been followed. Among encyclopedias, for example, the New International and the Americana follow different rules, and the student who does not observe that fact may miss the article for which he is looking. The alphabetizing of words containing an unlauted vowel is a possible source of confusion in many books, and in foreign reference books, in general, one should always remember points in which the foreign alphabetizing differs from the English.
6. If the work in question purports to be a new edition, note carefully the extent of revision claimed for it and check this by comparison with earlier editions. New or revised editions often present very special difficulties, and the examination should be extended enough to determine whether the revision is (a) so complete and thorough that

it supersedes the earlier work, (b) thorough, but with the omission of some material, included in the earlier work which is still useful, in which case the two editions may have to be used together, or (c) so insufficient and superficial that the earlier edition is still to be preferred. A reference worker needs such information about a book for two purposes: (1) to decide whether or not the book should be purchased, and (2) to be able to explain to readers who ask for a so-called new edition why its purchase was not considered advisable.

NEW GUIDE TO REFERENCE BOOKS

"Reference books are the clearing-houses of knowledge. They are libraries in miniature, focusing into a single book information scattered through a thousand volumes. They are short-cuts to learning, pass-keys to the accumulated wisdom of the ages. The ordinary reader knows little of them, and realizes but slightly the great help they would be to him in his daily reading and daily living." *W. G. Jordan in Literary era*, 8:52.

"A selection of the best works of reference should be the corner-stone of every library collection." *A. R. Spofford in his Book for all readers*.

"It [a public library] should be rich in books of reference, in encyclopædias, where one may learn without cost of research what things are generally known. For it is far more useful to know these than to know those that are not generally known." *James Russell Lowell in his Books and libraries*.

PERIODICALS, ESSAYS, DEBATES, DISSERTATIONS

PERIODICALS

Periodicals form a very important element in reference work in any library, supplementing the book collections in several important ways. They are especially useful for the following purposes:

1. For subjects where it is of first importance to have the latest information available in print, periodicals often furnish articles that are later than any book on the subject. This use of periodicals is of special importance in the sciences, in technology, and in political, economic, and industrial questions of current interest.

2. Periodicals often contain articles on subjects about which the library has no books, or even about which no books have yet been written. This is especially true in the case of small or obscure subjects, or subjects of purely local or temporary interest.

3. Periodical articles are often very useful as showing contemporary opinion on any given event, subject, person, book, etc. Periodicals, newspapers, and contemporary memoirs are the three main sources for such information, and of these three sources, periodical files are the most easily used and most serviceable in the ordinary library.

To make the best use of periodical literature and to answer the ordinary questions about periodicals, the reference worker needs three types of reference aids. These are:

1. The *index* to periodicals, which furnishes a guide to the contents of files of periodicals, serving the same purpose for articles in periodicals that the library card catalog does for the books in the library.

2. The *bibliography* or *catalog* of periodicals which is a list of the periodicals themselves, not an index to their contents, and which furnishes information about the periodicals listed, their correct titles, history, character, editors, prices, publishers, etc.

3. The *union list* of periodicals, which supplies information as to where sets of the periodicals included in the list may be found. Such lists are usually regional, *i. e.* for a given city, or larger area.

The pioneer index and, though no longer continued, still a very important index to American and English periodicals, since it covers the longest period, 105 years, and indexes the large total of about 590,000 articles in 12,241 volumes of 470 different American and English periodicals. A subject index only, includes *no author entries*; authors' names appear frequently as entries, but only as subject entries for biographical or critical articles

about such authors. To make intelligent use of the index the student should remember the following points: (1) no author entries; (2) all articles having a distinct subject are entered under that subject; (3) articles having no subject, *i. e.* fiction, poems, plays, are entered under the first word of the title not an article; (4) book reviews are entered in two different ways: (a) reviews of a book which has a definite subject are entered under subject of the book; (b) reviews of a book which does not have a distinct subject, *i. e.* a novel, a work of poetry, a drama, are entered under the name of the author reviewed. Approximately complete for the periodicals covered, except in the following respects: (1) very brief articles, notes, etc. generally omitted; (2) minor book reviews not included; (3) some English periodicals included in volume 1 are incompletely indexed because of failure in collaboration between the English and American indexers. Information given about each article includes its title, author's name in curves when it was known or could be ascertained, abbreviated title of periodical, volume and page reference. Neither inclusive paging nor date is given, but the date (year only) can be worked out from the "Chronological conspectus," an ingenious table at the beginning of each volume. The list of periodicals indexed comprises principally periodicals of a general nature but a few selected periodicals on special subjects are included. In general the work of both indexing and printing is very accurate and there are comparatively few typographical errors. A list of errata has been published in the Bulletin of bibliography as follows—2:24-25, 40-41, 56-58, 75-76, 133-134; 3:25: 4:11-12, 72.

Poole's index to periodical literature. Abridged ed. ed. by W. I. Fletcher and Mary Poole. Bost. Houghton, 1901. 843 p. 27^{cm}. \$12. **050**

—First supplement, 1900-04. Bost. Houghton, 1905. 260 p. 27^{cm}. o. p.

A condensation of Poole's Index, including all references to 37 popular periodicals still published, to the end of 1899. Designed especially for the small library, but of value to all libraries, large or small, on account of its one alphabet and the fact that it gives references enough for all ordinary work.

Annual literary index. 1892-1904. Including periodicals, American and English; essays, book-chapters, etc.; with author-index, bibliographies, necrology, and index to dates of principal events. N. Y. Publishers' weekly, 1893-1905. 13 v. 27^{cm}. o. p. **050**

Ed. by W. I. Fletcher and R. R. Bowker.

Continued 1905-10 by the Annual library index.

Contents of each volume: (1) Subject index to periodicals; (2) Subject index to general literature; (3) Author index to (1) and (2); (4) Bibliographies; (5) Necrology; (6) Index to dates of principal events.

A composite annual index containing among the six sections of the contents noted above four distinct indexes: (1) a subject index which was an annual continuation of Poole, indexing the same periodicals in the same way and forming the basis for the five-yearly Poole supplements; (2) a subject index to essays, which continued the A. L. A. index; (3) a much needed author index, never incorporated in Poole, and (6) an index to dates, which served practically as an index to newspapers. The Annual literary index has been in large measure superseded by the Poole supplements and the second edition and supplement of the A. L. A. index, but it is still useful for the author indexes, which furnish the only extended author key to the sets of Poole periodicals before 1900. Lists (4)-(6) are still occasionally useful.

Annual library index. 1905-10. Including periodicals, American and English; essays, book-chapters, etc.; bibliographies, necrology, and index to dates of principal events and select lists of public libraries in the United States and Canada and of private collectors of books. N. Y. Publishers' weekly, 1906-11. 6 v. 27^{cm}. o. p. **050**

Subtitle varies.

Editors: 1905, W. I. Fletcher, H. E. Haines; 1906-09, W. I. Fletcher; 1910, W. I. Fletcher and others.

Preceded by the Annual literary index (1892-1904).

Contents of each volume: (1) Index of periodicals, author, title and subject in one alphabet; (2) Index to general literature; (3) Bibliographies; (4) Necrology; (5) Index to dates of principal events; (6) Selected list of public libraries in the U. S. and Canada; (7) Selected list of private collectors of books.

Of the above contents (1)-(5) are found in all volumes, (6) in 1908-10 only, and (7) in 1910 only.

As an index the Annual library index differed from its predecessor, the Annual literary index, principally in the fact that its index to periodicals contained authors, titles and subjects in one alphabet instead of two separate subject and author lists. Now partly superseded, although it must still be used for many author entries for 1905-06; for subject entries it is now practically superseded by the cumulated volumes of the Readers' guide and Readers' guide supplement (see p. 7). The other lists are still useful.

Readers' guide to periodical literature (cumulated), 1909-1921. White Plains, N. Y. Wilson, 1905-15; N. Y. Wilson, 1919-22. v. 1-5. 27^{cm}. v. 1. o. p. v. 2, \$24. v. 3, \$32. v. 4, \$27. v. 5, \$35. 050

—[annual] 1922-. N. Y. Wilson, 1922-. 26^{cm}.

—[monthly] 1922-. 26^{cm}. Price on service basis; apply to publishers.

v. 1, 1900-04; v. 2, 1905-09; v. 3, 1910-14; v. 4, 1915-18; v. 5, 1919-21.

A cumulative index, made up of three forms or sections: (1) permanent cumulated volumes, (2) annual volumes, to be used as supplements to the cumulated volumes until superseded by a new permanent volume, and (3) monthly issues, cumulating quarterly (*i. e.*, March 3 months, June 6 months, September 9 months, etc.) until the last or December number forms a new annual volume. A complete set to date always consists of all permanent cumulated volumes, all annuals since the last cumulated, the latest quarterly cumulation of the current year and the current (latest monthly) number.

Started in 1901 as an index for the small library, covering at first only 15 of the more popular periodicals, and gradually extended until in 1903 it absorbed the Cumulative index (see below) and in 1911 took over the work of the Annual library index. The five permanent volumes contain about 820,000 entries of articles in 3,312 volumes of 168 different periodicals, and the 1922 issue covers 100 periodicals. A modern index of the best type. Its special features are: (1) full dictionary cataloging of all articles, *i. e.*, their entry under author, subject, and title when necessary; (2) uniformity of entries, owing to the fact that the work is done by a few professional indexers rather than by many voluntary collaborators; (3) use of catalog subject headings instead of catchword subjects; (4) full information in the references, *i. e.*, refers not only to volume and page, but also to exact date and inclusive paging, and indicates illustrations, portraits, etc.; (5) the cumulative features of the monthly issues, which keep the index well to date without multiplying alphabets to be consulted; (6) the indexing of all book reviews, through 1904, under author reviewed; after 1905 reviews are generally omitted because included in the Book review digest; (7) the indexing, in the 2d and 3d cumulated volumes, of some 597 composite books, thus forming an unofficial continuation of the A. L. A. index of general literature (see p. 25). This book indexing was abandoned after 1914 because the analytic work in the Standard catalog now being prepared by the same firm will take its place.

Readers' guide to periodical literature: Supplement, 1907-19; author and subject index to a selected list of periodicals not included in the Readers' guide, and to composite books. White Plains, N. Y.

Wilson 1916; N. Y. Wilson, 1920. v. 1-2. 26^{cm}. Price on service basis; apply to publisher. 050

v. 1, 1907-15; v. 2, 1916-19.

Author and subject index, on the same plan as the Readers' guide. First volume indexes 74 periodicals of which 55 are indexed for the period 1907-15, and 19 for the period 1913-15 only, as they were already indexed for previous years in the Readers' guide. Indexes also some 55 composite books. In all about 89,000 articles are listed.

Second volume indexes 126 periodicals, of which 81 are indexed for the period 1916-19 in continuation, of the similar indexing in volume 1, and 45, principally foreign periodicals and society transactions, are indexed for varying periods between 1909-1919 in continuation of the index cards formerly issued by the A. L. A. Publishing Board. The indexing work for the A. L. A. serials is still done by the cooperating libraries, but entries are incorporated in the Readers' guide supplement and the issue on cards discontinued.

Continued by the following:

International index to periodicals, devoted chiefly to the humanities and science ... A cumulative author and subject index to a selected list of the periodicals of the world. Formerly Readers' Guide, Supplement. v. 8-9, 1920-21. N. Y. Wilson, 1921-22*. 2 v. 26^{cm}. Service basis. 050

Formerly Readers' Guide Supplement; title changed, 1920, to International index.

Published five times a year, March-January, cumulating (March 3 months, May 5 months, September 4 months, November 6 months) the January number of each year forming the annual cumulation for the previous year. The 1921 annual indexes about 200 periodicals, of which 155 were indexed by the International index staff, and 45, former A. L. A. serials, were indexed by seven cooperating libraries under the editorship of W. S. Merrill, of the Newberry Library. Includes 74 foreign periodicals, in 6 different languages.

Cumulative index to a selected list of periodicals, 1896-Jun. 1903. Cleveland, Cumulative index co. 1897-1903. 8 v. 25^{cm}. o. p. 050

Started by the Cleveland public library (v. 1-3), continued by the Helman-Taylor co. (v. 4), then by the Cumulative index co. (v. 5-8) Consolidated with the Readers' guide, July, 1903.

Monthly, with quarterly and annual cumulations. No annual cumulations after 1898. Indexed 50 periodicals, by authors, titles, subjects. Portraits and book reviews are indexed. Now largely superseded but occasionally useful for material not included in the corresponding volumes of Poole.

Magazine subject-index; a subject-index to seventy-nine American and English

periodicals, forty-four indexed from their first issues to December 31, 1907, thirty-five indexed for the year 1907; comp. by F. W. Faxon. Boston book co. 1908. v. 1. 24^{cm}.

050

An index of subjects only, not of authors or titles, except that fiction when included is indexed under author's name. Indexes all material with exact reference, giving abbreviated title of periodical, volume, date, inclusive paging and indication of illustrations, portraits, maps, and plans. Intended as a supplement to other indexes and so includes no periodicals indexed in either Poole, the Readers' guide, or Annual library index. While the whole list of periodicals is general in character about half of the titles relate to history, especially local history, and the index specializes also in travel, mountaineering, exploration, out-door life, and fine arts. Indexes all important articles in the periodicals covered but omits short or trivial articles, poetry, and most fiction, though continued stories and short stories by notable writers are included. Continued by the following:

Annual magazine subject-index for 1908-20. A subject-index to American and English periodicals and society publications, Bost. Faxon, 1909-21.* v. 1-13. 24^{cm}. Prices vary.

050

Beginning with 1909, includes as pt. 2 the Dramatic index for 1909-20.

An annual supplement to the Magazine subject index, compiled on the same plan and specializing in the same subjects. In accordance with the plan of not indexing any periodicals covered by other general indexes, this index varies its list from year to year, dropping periodicals which have been taken over by other indexes and adding new titles. The annual volumes add many new local history titles, especially transactions of local history societies indexed in Griffin's bibliography (see p. 32), and as these are in many cases indexed back to the date when Griffin stopped, the index constitutes an informal continuation of Griffin. The only exception to the rule not to index material included elsewhere is in the case of a few of these history periodicals which are left in for the sake of completeness in this specialty. Indexes more English periodicals than other American indexes; out of 166 periodicals indexed in 1920, 25 are English and 9 Canadian.

Review of reviews. Index to the periodicals of 1890-1902. [v. 1]-13. Lond. and N. Y., Review of reviews, 1891-1903. 13 v. illus., ports. 25^{cm}. annual. 15s. per vol.

050

Title varies: v. 1, 1891, The Annual index of periodicals & photographs for 1890; v. 2-4, Index to the periodical literature of the world. (Covering the year 1891-1893.)

No more published.

Primarily a subject index, but contains a fair number of author entries also, especially in the later

volumes. Indexes material under rather broad subjects and gives for each, brief title, author's name when known, periodical, volume, month, and page reference, and, in parentheses, a reference to the volume, month, and page of the *Review of reviews* where a summary or other notice of the article is to be found. Indicates maps and illustrations. Indexes novels, short stories and poems under authors' names, not under title; as a special feature gives under such subjects as music, architecture, fiction, etc., a list of persons connected with those subjects who are noticed elsewhere in the index. The number of periodicals indexed varies from 117 in 1890 to 195 in 1902. Principally useful because it covers many English periodicals (about 100 in the later volumes) which are not indexed in Poole. Not needed in the small library.

Subject index to periodicals, 1915-16, issued at the request of the Council of the Library association. Lond. Library assoc. 1919. 744 p. 32^{cm}. £4, 4s.

050

An English index, started in 1915 under the title Athenaeum subject index, title changed, 1919, to Subject index. Issued, 1915-16, in two forms: (1) preliminary Class lists, each an alphabetical subject index with brief author index to the subject part, and (2) Annual volume for each year, combining in one alphabet the material of all the class lists. The annual for 1915 covered one year only and is superseded by the 1916 annual which is a cumulated volume, covering the two years 1915-16.

This 1915-16 volume is an alphabetical subject index to 530 periodicals, including 36 in foreign languages. The subject list, which constitutes the main part, contains 29,000 entries, and gives for each article its title, sometimes a brief explanatory note, author, date, volume and inclusive paging. The author index, which refers to the subject part, contains 14,000 entries. Duplicates much of the material contained in the Readers' guide and Readers' guide supplement, but indexes also many periodicals not covered by the American indexes, especially British local history periodicals, proceedings of antiquarian societies, etc. Continued for 1917-19 by the following:

Subject index to periodicals: Class lists, 1917-19. Lond. Library assoc. 1920-21. Subs. price to class lists and author index, £4, 4s.

050

To consist of 7 class lists and one general author index, indexing 580 periodicals, English and foreign. Class lists issued or announced are: A, Theology and philosophy; 175 cols. 7s 6d.; B-E; Historical, political and economic sciences, 496 cols. 21s.; F, Education and child welfare. 88 cols. 4s.; G, Fine arts and archaeology, 212 cols. 9s.; H, Music, 56 cols. 2s 6d.; I, Language and literature pt. 1, Classical, oriental and primitive, 54 cols. 2s 6d.; pt. 2, Modern, including bibliography and library administration, 122 cols. 5s.; J, Science and technology (in preparation).

FOREIGN

Bibliographie der fremdsprachigen zeitschriftenliteratur, 1911-19. Lpz. Dietrich, 1911-21. v. 1-18. 26^{cm}. (Internationale bibliographie der zeitschriftenliteratur, Abteilung B.) Price varies: M. 30- M. 155. per vol. **050**

Similar in general plan and arrangement to the *Bibliographie der deutschen zeitschriftenliteratur* which now forms Abteilung A of the *Internationale bibliographie*. Indexes about 2,000 periodicals and general works in English and all the principal foreign languages except German. In the English and American library the principal use of this index will probably be for the large amount of French and Italian material indexed. A subject list only, no author indexes.

BELGIAN

Bibliographie de Belgique: 2^{ème} partie, Sommaire des périodiques, 1897-1913. Bruxelles, Van Oest., 1897-1913. **054**

Title and frequency vary. 1899-1911, is 3d part of *Bibliographie de Belgique* and has title *Bulletin des sommaires*; 1912-13, is 2d part and has title *Sommaire des périodiques*; 1899-1911, frequency varied, monthly (sometimes bimonthly or quarterly) with annual author index; 1912-13, semiannual with annual author and subject indexes. Each number is a classed subject index arranged by the Belgian Dewey D. C. numbers; indexes a large number of periodicals, gives fairly full information for each article, i. e. author, title, periodical volume and number. A cumbersome but usable index, not easy to handle for quick reference work but useful when the whole field is to be covered, as it supplies material not easily findable in any other way.

Discontinued 1914, because of the European war. Continued by the following:

Bibliographie de Belgique: 2^{ème} partie; Bulletin mensuel des articles de fond parus dans les revues belges. Janvier, 1921-. Bruxelles, Service de la Bibliographie de Belgique, 1921-. 15 fr. per year: printed on one side only, 25 fr. per year. **054**

Jaarg. 1-8, 1914-21. s'-Gravenhage, 1914-21. 8 v. 20^{cm}. Annual subs. 1 fl. **053**

Monthly, Feb.-Dec. 11 numbers a year. The first volume indexed 440 periodicals, the second nearly as many. A monthly classified subject index arranged, like the Belgian index noted above by a modified decimal classification order, with annual index of (1) authors (2) small subjects, alphabetically. Gives for each article included author, full title, periodical, volume, year and inclusive paging and D. C. class number, with occasional contents or descriptive notes. Issued in three forms: (1) on ordinary paper printed on both sides; (2) on thin paper printed on one side only; (3) on cards. For the very large library or the library specializing in Dutch material, but not needed in other types.

After January, 1922, issue in book form discontinued.

Monthly index to 49 general periodicals, including a few newspapers. No annual cumulations. Each number contains authors and subjects in one alphabet with a separate list of book reviews at the end. Useful in the very large library, or in the smaller library which specializes in Dutch material.

FRENCH

Argus des revues, indicateur universel, contient des articles provenant de près de 1,000 revues françaises et étrangères. Paris, Argus de la presse, 1880-1914. annual subs. 18 fr. **054**

Not a regular general index, but a bimonthly list of the more important articles of general interest selected from about 1,000 French, Belgian and other foreign periodicals and newspapers. A subject list with no author index, no annual index, no cumulations. Gives only brief title of article, author, title and number or date of periodical in which found. Not satisfactory for quick reference work, but offers the only substitute for a general French index covering a long period and so is useful when it is important to get at a large amount of French material. For the large reference library only.

Discontinued 1914, because of the European war.

Répertoire bibliographique des principales revues françaises. 1897-99. Paris, Per Lamm, 1898-1900. v. 1-3. 26^{cm}. v. 1, 16.50 fr.; v. 2, 20 fr.; v. 3, 22 fr. **054**

A useful index, unfortunately discontinued because of lack of support. Each volume contains: (1) subject index giving title of article, author's name, and title and volume or number of the period-

ical and page reference, (2) author index giving somewhat briefer information. Vol. 1 indexes 147 periodicals, vol. 2, 257, and vol. 3, 346. The Société française de bibliographie planned to revive this index but so far the plan has not been carried out.

Title varies slightly.

Editors: 1896-, Felix Dietrich and others.

— **Ergänzungs-band 1-14**. Lpz. Dietrich, 1908-1919. v. 1-14. 25^{cm}.

Numbered in set as v. 22A, 24A, 28A, 30A, 32A, 33A, 35A, 35B, 36B, 37A, 38A, 39B, 41A, 42A.

Contents: Erg. bd. 1, 1896-98; 2, 1896-1908; 3, 1893-95; 4, 1891-92; 5, 1889-90; 6, 1911-13; 7, 1887-88; 8, 1913-14; 9, 1885-86; 10, 1914-15; 11, 1883-84; 12, 1881-82; 13, 1915-17; 14, 1879-81.

A voluminous and comprehensive index valuable because of the large number of important German periodicals, transactions, yearbooks and other composite works indexed, but difficult to use for quick reference partly because of the abbreviation of references and compactness of printing, and partly because the form of publication in semi-annual volumes with no cumulation necessitates the consultation of many alphabets. Except in the case of vols. 34-36 and 40-40a-41, which have a combined author index, each volume consists of (1) a subject index arranged alphabetically by rather large subjects, giving for each article indexed its title, author's name in curves when known, reference to periodical by key number instead of title, and volume and page reference; and (2) an author index to the subject index, the latter omitted for the time being in some recent volumes. The number of periodicals indexed is very large, ranging from 275 in the first volume to about 3,000 in later volumes. The period covered in the whole set is 42 years, for while vol. 1 starts with 1896 the retrospective indexing of the *Ergänzungsbände* carries the work back to 1879. Important in university work and in large libraries which have many German periodicals, but not generally recommended for other libraries. Often especially important for biography because it indexes many yearbooks of learned societies containing obituary notices.

Supplementary volumes to be issued every six years.

Not "a general index, but a subject catalog of some 71,198 biographical articles in the sets of 448 periodicals (16,161 volumes) contained in the library of the Italian Chamber of Deputies. Each volume has (1) a main subject list which gives for each article indexed its title, author, and the title and volume or year of the periodical in which it is to be found, and (2) a brief author index referring to the subject list. The supplementary volumes index both the volumes added during the period covered and also earlier material omitted from the first volume. The "Indice generale" refers to all names included in the subject lists of the first volume and supplements 1-5. Sets indexed include the principal Italian periodicals and society transactions and also many important English, French, German and Spanish titles. In the American library the principal use of this catalog is for the Italian and French material indexed, but it is occasionally useful even for the American and English material already indexed in Poole, because it can be used from the author as well as the subject side, and therefore serves to supplement Poole. Useful in the university or large reference library, but not recommended for the small library.

The list of periodicals included in v. 2 furnishes a nearly complete bibliography of Norwegian periodicals. Very valuable in the large reference library or in the library specializing in Scandinavian material.

— — General index to Experiment station records, vols. XIII to XXV, 1901-11. Wash. Govt. print. off., 1913. 1159 p. 24^{cm}. \$1.

A record and digest of current agricultural literature, not planned as an index of the subject but covering the field so fully that it serves practically as an index to the periodical, bulletin, and report material on this subject, in English and the principal foreign languages. Each monthly number contains a digest of recent important articles and reports with exact reference to the full article. In addition to monthly numbers there are bimonthly abstract numbers, so that a semiannual volume consists of nine numbers. There are no cumulations of the digests, but there is an author and subject index to each volume referring to the monthly issues and for the volumes before 1911 these separate indexes are superseded by the two general indexes 1889-1901 and 1901-11. Less easy to use for quick reference than the new Agricultural index, but fuller for scientific use as it indexes more scientific material and includes foreign language material as well as English.

Art and Archaeology

Gomme, George Laurence. Index of archæological papers, 1665-1890. Lond. Constable, 1907. 910 p. 22^{cm}. 25s.

016.913

A useful author index to some 94 sets of English archæological periodicals and transactions of local antiquarian societies. Gives for each article indexed author's name, full title, periodical, volume or date, and inclusive paging. Principally British archæology but includes also material on classical and other non-British antiquities. A subject index to the same material, which was contemplated but not undertaken when the author index was made, is now in preparation. Continued by the following:

Index of archæological papers published in 1891-1910. Lond. Constable, 1892-1914.* v. 1-20. 22^{cm}. 1s. each. **016.913**

An annual continuation of Gomme's index, indexing the same type of material and following the same plan as far as the author index is concerned, but differing from the main work in that each annual volume has a subject index to the author list. While each volume nominally covers one year, many cover a longer period since whenever a new periodical is added to the list it is indexed back to 1891.

Publication suspended after 1914. Most of the periodicals indexed are now included in the Subject index to periodicals, 1915-16, described p. 8.

Book reviews

Book review digest, 1905-21. White Plains, N. Y. Wilson, 1905-22. v. 1-17. 26^{cm}. \$12 per year. Annual cumulated vol. \$5. **050**

A digest and index of selected book reviews in over 50 English and American periodicals, principally general in character. Arranged alphabetically by author of book reviewed, with subject and title index. For each book entered gives author, title, place, publisher and price, a brief descriptive note, quotations from selected book reviews with exact reference to periodical in which review appeared, and references only, without quotation, to other reviews. Indicates length of review in number of words and whether favorable or unfavorable. From the public library point of view and primarily useful in the selection of books for such a library; less useful in the college or university library partly because of the type of book listed and partly because the reviews indexed are taken principally from the general and not to any great extent from the special journals. Monthly; with a semi-annual cumulation in August, and an annual cumulation of the main list in February which forms an annual volume; the subject, title and pseudonym index cumulates monthly, the index in a current number referring to all previous issues of the current volume since the last cumulation. The 1921 annual has a cumulated index for the years 1917-21.

Pittsburgh. Carnegie Library. Technical book review index, issued by the Technology dept. of the Carnegie Library of Pittsburgh, 1917-21. Pittsburgh, Carnegie library, 1917-21. v. 1-5. 50 cts per yr. **016.6**

A quarterly index important as listing material much of which is not given in the Book review digest, and as a useful aid to book selection in a special field. Gives title of book and bibliographic data, references to periodicals containing reviews, and brief quotations.

Bibliographie der Rezensionen und referate, 1900-19. Lpz. Dietrich, 1901-22. v. 1-33. 25^{cm}. Internationale bibliographie der zeitschriftenliteratur, Abteilung C. Price varies from M. 12.50 to M. 500. **053**

Title varies, 1901-10 Bibliographie der deutschen Rezensionen.

1901-10 inclusive, one volume per year, indexing reviews of books printed in some 3,000 German periodicals; 1911- date, two volumes per year, the first volume of each year indexing reviews in German periodicals, the second volume indexing reviews in about 2,000 periodicals in other languages than German. A very comprehensive list, including more books of the university grade than the Book review digest and many references to special journals, and therefore often more useful than the Book review digest in the university library, when only references to reviews are wanted. Does not

give digests or quotations from the reviews listed. The volumes which index reviews in German periodicals only cover the same list as the Bibliographie der deutschen zeitschriftenliteratur (see p. 10) and supplement that work; the volumes indexing non-German periodicals do the same thing for the Bibliographie der fremdsprachigen zeitschriftenliteratur (see p. 9).

Drama

Dramatic index for 1909-20, covering articles and illustrations concerning the stage and its players in the periodicals of America and England; with a record of books on the drama and of texts of plays. Bost. Faxon, 1910-21.* v. 1-12. 24^{cm}. \$7.50 per vol. Special price for set. **016.792**

Issued separately, and also as part 2 of the Annual magazine subject index, 1909-20. Contains the cumulation* of the Dramatic index published in the quarterly numbers of the Bulletin of bibliography.

Issues for 1912-16, 1919-20 have appendix, Dramatic books and plays (in English) published during 1912-16, 1919-20.

An annual subject index to all articles about the drama, the theater, actors and actresses, playwrights, librettists, managers, etc., to all synopses of plays, and to all stage and dramatic portraits, scenes from plays and other theatrical illustrations contained in about 200 English and American periodicals, and to texts of plays whether published in book or magazine form. Magazine articles are entered under subject only, texts of plays are entered under title or under the form heading "dramas" with cross reference from author, costume portraits are entered under both the actor and the character. All references are exact, *i. e.* to title of periodical, volume, date, and inclusive paging, with length of article indicated in fractions if less than one page, and full indication of illustrations, portraits, etc. While the index nominally begins with 1909 there is some retrospective indexing, *e. g.* the 1910 volume indexes the *Theatre* back to its first volume 1906. From 1912 the dramatic books of the year are indexed both in the main index and in the appendix, Dramatic books and plays, which consists of (1) author list of books about the theater, (2) author list of play texts, (3) title list of texts. A very useful index, necessary in any library which makes much use of dramatic material. Kept to date by the quarterly indexes in the Bulletin of bibliography.

Mathematics, Mechanics, Physics, Chemistry, Astronomy, Meteorology, Mineralogy, Geology, Geography, Palaeontology, Biology, Botany, Zoology, Anatomy, Anthropology, Physiology, and Bacteriology. Of the seventeen indexes projected only the first three have been issued so far. Includes, among its reports of events, record of new legislation, notices of approaching conferences, meetings, etc., establishment of new offices, libraries, etc. A very useful index, although it duplicates some of the material in the general indexes. The 1921 cumulation indexes articles in some 550 periodicals and refers to analytical material in about 250 other publications.

Technology

Engineering index, 1884-1905. N. Y. Engineering magazine, 1892-1906. 4 v. 24^{cm}. o. p. **016.62**

Continued after 1905 by the following:

Title varies, publisher varies; title, 1919-, Engineering index.

Continues the Engineering index 1884-1905, v. 1-4, covering the same field in the same detail, but (for the years 1906-18) with a different arrangement *i. e.* a classed subject index, not an alphabetical subject index, grouped in 8 large classes, Civil engineering, Electrical engineering, Industrial econ-

omy, Marine and naval engineering, Mechanical engineering, Mining and metallurgy, Railway engineering, Street and electric railways.

Beginning 1919, the form is changed to an alphabetical subject index, indexing some 700 periodicals, including many foreign titles, and giving for each article exact reference to title, date, volume and page of the periodical, number of illustrations and a brief digest. Continued for current work by the following:

Engineering index [monthly] in Mechanical engineering, the monthly journal published by the Amer. soc. of mechanical engineers. Easton, Pa. 1922. \$4 per yr.

Monthly index based upon a review of 1200 technical publications received by the United Engineering societies library, New York. At the end of each year the 12 monthly numbers are combined, with the addition of items on civil, electrical and mining engineering, etc., to form the annual index described above.

Bimonthly index, cumulating throughout the year, with the December number forming an annual cumulation. Beginning with v. 7, a two-year cumulation is issued every other year. Indexes many of the same periodicals as the Engineering index (annual) but differs from that index in having (1) a rather wider range of subjects, including commercial and business as well as technological subjects, (2) less foreign material. More useful than the Engineering index in the general library. In general follows the same plan of indexing as the Readers' guide except that articles are indexed only under subjects and not under authors also. Indexes principally material in English, but from 1919 on includes some foreign journals.

Crane, Walter Richard. Index of mining engineering literature, comprising an index of mining, metallurgical, civil, mechanical, electrical and chemical engineering subjects as related to mining engineering. N. Y. Wiley, 1909-12. 2 v. 23^{cm}. v. 1, \$5; v. 2, \$4. **016.6**

The standard American list; comprehensive, listing, in 1922, 22,353 newspapers and periodicals, but not claiming completeness, as it intentionally omits certain classes of papers. *e. g.* publications of private and high schools and smaller colleges, local church papers and most house organs issued merely to exploit goods of their firms. The main list, no. 4, covers more than 1,000 pages and gives (1) some descriptive and statistical matter about each state, a list of its counties, marking those which have no newspapers, and considerable gazetteer information about each city, *i. e.* its distance and direction from some important place, its railroads, water or stage communications, note of banks or of nearest banking places, etc., leading manufactures, products and institutions and (2) detailed information about each paper or periodical listed including its name, frequency, character or politics, date of foundation, size of column and page, subscription price, circulation figures, names of editors and publishers. Contents: (1) Alphabetic title list giving in general, for each periodical, frequency of publication, date of founding, publisher's address, subscription

price, note of changed or merged title; (2) subject index, less complete than title list. Lists about 12,000 titles, omitting railroad reports and most public documents and including society publications sparingly. Includes fewer titles than Ayer and often gives briefer information for those included, but more convenient than Ayer for quick reference work because of alphabetic arrangement. An interesting feature of the 4th ed. is the long list of house organs, given under the heading trade in the subject index.

II: The provincial press, arranged chronologically by date of first known issue, 1701-1919; alphabetical index to sect. II.

Is based upon the collections of the British museum, including the two special Thomason and Burney collections, with some reference to copies and numbers in other libraries not found in the British Museum. Each title is listed under the date of the earliest copy which has been found for examination, and the information given for it includes number and date of the earliest issue, date of discontinuance, if known, and in some cases name of printer, editor, distributor, and a reference to the library or collection if it is other than the British Museum's general collection.

UNION LISTS

A union list of periodicals is a catalog, usually in alphabetical title arrangement, of the periodicals to be found in the libraries in a special region, with indication of the libraries containing any given title. There are two types of such lists, (1) lists of periodicals currently received (2) lists of sets, with exact indication of what portion of each set is in the libraries listed. The second type is more useful. Such lists are of great reference importance since they often show where a library can find a periodical or volume not in its own collections. The principal use of such lists is for reference and inter-library loan purposes but they are often useful also as catalogers' aids. Foreign union lists are naturally not useful for inter-library loans, but are often very helpful in identifying foreign titles.

NEWSPAPERS

Newspapers are often very important in certain lines of reference work. Current issues are helpful for reference work

on questions of the day, current history, politics, local happenings, current or local opinion, etc. and back volumes serve the same purpose for the current history, etc., of an earlier period, and are particularly important as contemporary records, as registers of contemporary opinion and as records of facts often too small or too local in their application to be included in the general reference books. Bound files of newspapers are therefore important additions to the reference equipment of any library which can afford and use them. As such files are very expensive to bind and shelve, care should be taken to choose for preservation only those actually needed, and especially those which, from their general character, indexes, etc. are most likely to be useful. To make intelligent use of newspapers the reference worker needs the same type of reference aids that he needs for periodicals, *i. e.*, (1) indexes, (2) bibliographies and (3) lists of other libraries. These differ however in some ways from the corresponding aids for periodicals. There is, for example, no general index to newspapers similar to Poole. Such a work would be a practical impossibility, and moreover is not needed in just the same way as an index to periodicals. Newspapers all publish reports of any event of general interest, at approximately the same time, generally one day after it occurred, and the substance of such information is largely the same in all important papers. The date of any event is the clue needed and an index of dates, or an index to any one newspaper will furnish a workable index to all newspapers for subjects of general interest. This, of course, is not true of purely local or special articles.

INDEXES

AMERICAN AND ENGLISH

Index to dates of current events, 1911-13. N. Y. Bowker, 1912-14. 3 v. 24^{cm}. \$4 per year. **070**

Monthly, with quarterly and semi-annual cumulations. Arranged alphabetically by subjects and names, followed by date of occurrence of each event. The annual cumulation is included in the American library annual, and is not published separately.

While this index does not refer directly to newspapers the fact that it gives the dates of all events listed makes it serviceable as an index to all newspapers as far as general news is concerned. It cannot of course be used as an index for local news not of general interest or for special articles or editorials. For a similar index before 1911 see the Index to dates included as part of the Annual literary index 1892-1904 and the Annual library index 1905-1910. Discontinued after 1914 and succeeded by the following:

Information annual, a continuous cyclopedia and digest of current events. 1915-16. N. Y. Bowker, 1916; Cumulative digest corp. 1917. v. 1-2, and 1 unb. no. 25^{cm}. 031

Issued in three forms or sections: (1) monthly, (2) quarterly, (3) annual. Price, monthly \$3 a year, quarterly \$2, monthly and quarterly \$4, monthly, quarterly and annual \$6, annual alone \$4.

A continuation and expansion of the Index to dates. Gives in addition to date a concise descriptive summary of each event and so serves the double purpose of newspaper index and encyclopedia of current events.

No more published. Continued as the Business digest (see p. 89).

New York Times index. v. 1-9, 1913-21. N. Y. New York Times, 1913-21. 28^{cm}. \$8. per year; paper, \$6. per year. 071

A carefully made quarterly index, with entries under small subjects, exact reference to date, page and column, and plentiful cross references to names and related topics. The brief synopses of articles answer some questions without reference to the paper itself. Each volume consists of four parts.

New York Tribune. New-York daily tribune index for 1875-1906. N. Y. Tribune assoc. 1876-[1907] 31 v. 19-20^{cm}. Annual. \$1 per vol. 071

No more published. A much briefer index than the N. Y. Times index but useful while it lasted.

Times, London. Official index, 1906-21. Lond. Times off., 1907-22. 39 v. 25^{cm}. £10 10s. per yr. 072

Issued annually, 1906-13; semiannually, Jan.-June 1914; quarterly, July 1914-

Title varies: 1906-13, The annual index to the Times, 1914- The official index to the Times.

Minute alphabetical index referring to date, page and column. Volumes for 1906-13 form the annual cumulation of the monthly index published 1906-June 1914 and then discontinued.

—Palmer's index to the Times newspaper. 1791-1920. Lond. Palmer, 1868-1920. 21^{cm}. 30s. per vol. 072

Quarterly beginning with the index covering Oct.-Dec. 1867, pub. in 1868. The indexes for preceding volumes have been issued in the reverse order, from 2 to 11 a year, beginning with the one covering July-Sept. 1867, pub. in 1875.

Much briefer than the Official index noted above.

GENERAL LITERATURE

"A.L.A." index; an index to general literature. 2d ed. enl. and brought down to Jan. 1, 1900. Bost. [A.L.A. publishing board] 1901. 679 p. 27^{cm}. \$6. 040

— Supplement 1900-1910. Chic. A.L.A. publishing board, 1914. 223 p. 27^{cm}. \$4.

A subject index which attempts to do for books of essays and general literature what Poole's index does for periodicals.

"The general purpose was to index as far as possible all books common to our libraries which treat several subjects under one title and to the contents of which the ordinary catalogue furnishes no guide, although they are generally treated analytically in the more elaborate catalogues, and to save libraries in the future from the necessity of repeating each for itself the analytical work."—*Preface.*

The second edition indexes books belonging to the following classes: (1) Essays and similar collections of critical biographical and other monographs; (2) Books of travel and general history whose chapters or parts are worthy of separate reference; (3) Reports and publications of boards and associations dealing with sociological matters, and

publications of historical and literary societies; (4) Many miscellaneous books and some public documents.

Includes only books in English and books found in most libraries. Indexing is by catchword subjects, not catalog subjects. The second edition was supplemented by the annual Index to general literature, included in the Annual literary (library) index 1900-1910. These annual supplements are now superseded by the Supplement 1900-10 which cumulates all the material for the annual lists and adds references from 125 new books not previously indexed, adding a total of over 500 books to the several thousand covered by the main work. An informal supplement is found in the 2d and 3d five-yearly volumes of the Readers' guide, 1905-14, which index the contents of some 597 composite books, in addition to the regular indexing of periodicals (see p. 7).

Cotgreave, Alfred. A contents-subject index to general and periodical literature. Lond. Stock, 1900. 743 p. por. 18^{cm}. 10s. 6d. **028**

"The chief aim of the work is not to give everything which appears in a select number of works on a few selected subjects, but rather to cover as many subjects as possible, and give a few references to each one."—*Preface*.

The indexes described above cover a considerable portion of the composite books in English most commonly found in medium-sized libraries but omit many older and less common works which are quite as valuable though found in fewer libraries. Analytic subject references to the contents of many such books and also analytic author and title references to important collections, both English and foreign may be found in printed catalogs of certain libraries, such as the Peabody institute, the Boston Athenaeum, the London library, etc. For full description of these catalogs see under Library catalogs, p. 229.

The index volume to Brewer's World's best essays (see under Literature, p. 121) is often useful for material not covered by the A.L.A. index.

DISSERTATIONS

Catalogs or bibliographies of dissertations are extremely important reference tools in certain types of libraries, although almost negligible in other types. Dissertations or theses presented by candidates for the doctorate form a very special class of publications. As such degrees are given only for original work, each thesis must deal with some phase of a subject which has not been previously covered by a printed work. Each thesis therefore at the date of its publication is usually the only thing in print on that particular phase of its subject and its value to the reader interested in that subject is obvious. While some dissertations are issued by regular publishers and so appear in the ordinary trade bibliographies, most are privately printed and are listed only in the special bibliographies of dissertations. These bibliographies have therefore a distinct value in libraries which make much use of thesis material, *i. e.*, the large reference, special, and university libraries, and serve the following purposes: (1) to show the student who is trying to select a thesis subject whether

that subject has already been written on; (2) to show the order department whether a publication not listed in the ordinary trade lists is a dissertation and if so from what university it can be obtained; (3) to show the reference worker what material has been printed on very special or unusual subjects.

Contents of each volume: (1) Alphabetic list of theses printed during the year; (2) Classified list, arranged under the broad classes of the Library of Congress scheme; (3) Index of subjects; (4) Doctors whose theses have been printed during the year, arranged by institutions.

Lists 1 and 2 give full catalog information and, in case of reprints, indicate the periodical or other publication in which the thesis was first printed. Includes the theses of about 25 colleges and universities. The introduction in v. 1 gives titles of earlier printed lists of American theses.

FRENCH

France. Ministère de l'instruction publique et des beaux-arts. Catalogue des thèses et écrits académiques. Années scolaires 1884-1919. Paris, v. 1-3, Hachette, 1885-99; v. 4-7, Leroux, 1900-21.* v. 1-7. 24-27^{cm}. 1 fr. 50 c. per yr. **378.44**

Issued annually, 5 yearly parts being paged continuously to form a volume.

The official French list. Each annual issue 1885-1913 is arranged alphabetically by universities, with sub-arrangement by *facultés*; beginning 1914, the arrangement is by *facultés*. Gives for each thesis author's name, full title, place, date, size, paging. Each annual issue has an author index and each volume a subject and an author index. Issued in two editions: (1) book edition on ordinary paper printed on both sides, (2) on thin paper printed

on only one side, for clipping. Of great value in the university library, as the French theses are among the most important published.

There is no official list for the period before 1884, so for that period the following partial lists must be used:

Maire, Albert. Répertoire alphabétique des thèses de doctorat ès lettres des universités françaises, 1810–1900; avec table chronologique par université et table détaillée des matières. Paris, Picard, 1903. 226 p. 22^{cm}. 5 fr. **378.44**

List of 2,182 theses, arranged alphabetically by authors' names. Gives for each thesis author's name, title of thesis, place, publisher, date, paging, university, and a statement as to whether the thesis was published also in any other form. Marks rejected theses.

Mourier, Athénaïs, and Deltour, F. Notice sur le doctorat ès lettres, suivie du catalogue et de l'analyse des thèses françaises et latines admises par les facultés des lettres depuis 1810. Paris, Delalain, 1880. 442 p. 25^{cm}. 10 fr. **378.44**

This list, with its annual continuations, includes practically the same theses as Maire's Répertoire but arranges them by years and universities instead of alphabetically, and gives in addition to title and paging a full table of contents of each thesis. Gives very brief biographical data. Special value is for the full analysis of contents. Indexes: (1) subjects; (2) authors.

— Catalogue et analyse des thèses françaises et latines admises par les facultés des lettres. Paris, Delalain, 1882–1901. 21v. 25^{cm}. 1 fr. 50 c. per vol. **378.44**

Annual continuation of the above, following the same plan. No more published.

Maire, Albert. Catalogue des thèses de sciences soutenues en France de 1810 à 1890 inclusivement. Paris, Welter, 1892. 223 p. 25^{cm}. 10 fr. **378.44**

Lists more than 2,400 theses arranged by universities: (1) Paris, (2) The provincial universities, and under each university chronologically. Gives for each thesis author's full name with brief biographical data, title, place, publisher, date of publication, paging, plates, format, and date of sustaining theses. Indexes: (1) authors; (2) subjects.

Estanave, E. Revue décennale des thèses présentées à la Faculté des sciences de Paris, 1891–1900. Arcis-sur-Aube, Frémont, 1901. 114 p. 22^{cm}. 5 fr. **378.44**

Continues Maire but with a different arrangement, *i. e.* by the three large classes of mathematical, physical and natural sciences, and in each

group chronologically. Gives author's full name, with brief biographical data, title, place, publisher, date of publication, date of sustaining, and whether or not published in any other form. Refers to reviews and abstracts.

SOCIETY PUBLICATIONS

The serial publications issued by learned societies serve somewhat the same kind of reference use as do the more general periodicals, *i. e.*, they supplement the book collections of the library by furnishing articles more up to date, or more authoritative and special, than the book literature of the subject in question. Papers printed in academy and society transactions are usually based directly upon original research and are scholarly and scientific in character, and are therefore more valuable than articles in the more general periodicals. For this same reason, as they appeal to a more limited public, they are less often indexed in the general indexes of periodicals, although generally indexed in the special bibliographies and indexes. To use society transactions intelligently the reference worker needs the same kind of aids needed in work with periodicals, *i. e.*, indexes, bibliographies, and union lists or catalogues. For indexes use the indexes to periodicals, particularly the special indexes, described in the preceding chapter. The union lists of periodicals include many society transactions as well. For bibliographies, however, a special set of publications is available. Both the reference worker and the cataloger frequently need to look up information about the history, organization, officers, publications, addresses, etc., of the various learned societies, and for such purposes the following bibliographies, yearbooks and handbooks are useful. Certain of these, *e. g.*, Griffin, Terry, etc., are so arranged that they serve also as indexes to the publications covered.

Each volume contains (1) Public (*i. e.* governmental) unions, conferences, etc., arranged by subject according to the Belgian Dewey D. C.; (2) Private organizations, same arrangement; (3) Chronological list of international meetings, giving name, date and place; (4) Index of persons, Index of subjects. While the second volume contains the later information it does not entirely displace the first, but refers it for earlier material.

For each society gives brief information about its history and a full list of its publications, with detailed contents of each composite volume. Full author, subject and society indexes. The subject index makes the work usable as an index to articles in the serial publications of the societies listed.

BRITISH

Year-book of the scientific and learned societies of Great Britain and Ireland, giving an account of their origin, constitution, and working. Lond. Griffin, 1884-1921.* v. 1-38, 22^{cm}. 15s. per vol. 062

Sub-title varies.

Contents, 1921: (1) General societies; (2) Subject groups, *e. g.* Astronomy, Chemistry, Geography, Literature, etc. (3) Index of society names.

A very useful list, giving for each society authoritative information as to its corporate name, address, date of founding, object, officers, meetings, membership, titles of publications with prices, and contents of publications for the year covered. The first volume 1884 was a basic volume, containing considerable historical information not reprinted in later issues. For full information, therefore, both the first and latest volume should be consulted.

A useful though not complete work, on the same general plan as Griffin's Bibliography of American historical societies (see above).

Contents: (1) Catalogue of the publications of over 50 Scottish historical and kindred clubs and societies, arranged alphabetically by name of society, giving for each society its corporate name, date of founding, purpose, list of its publications, and contents of each volume if several papers are included; (2) author and subject index to the publications and contents notes. The index is quite full and is often useful for analytic references on small or out-of-the-way points in Scotch history.

Publ. in parts, 1895-1916.

Publication of the Comité des travaux historiques et scientifiques.

Issued in parts, 1885-1918.

Vol. 1-4 cover the literature published to the year 1885; v. 5-6, 1886-1900.

A monumental undertaking, the most important work on French societies. Arranged alphabetically first by *départements*, then by towns and under each town by the name of the society. For each society gives brief history, note of all changes of name, suspensions, mergers, etc., full titles, dates, etc., of all of its publications and full contents of each volume. An index of societies (also arranged by *départements*) at the end of v. 6 links together references to the same society in the main part and the supplement. Not limited to societies in France but includes also those in the French colonies and French societies abroad. Most useful at present for the historical matter about the societies and for the titles and collation and contents of the sets of their publications, but can not be used rapidly for the analytical material. An alphabetical author and subject index has been projected and if this is ever published the work will become enormously useful as an index to the periodicals and society literature of French history and related topics. Continued on the same plan and scale by the following:

Bibliographie annuelle des travaux historiques et archéologiques publiés par les sociétés savantes de la France dressée sous les auspices du Ministère de l'instruction publique. t. 1-3, années 1901/04-1909/10. Paris, Impr. nationale, 1906-14.* v. 1-3 in 9 pts. 28^{cm}. 10 fr. per vol.

Each volume consists of three annual issues.

Contents: v. 1, 1901/02-1903/04; v. 2, 1904/05-1906/07; v. 3, 1907/08-1909/10.

An annual continuation of the above, on the same plan and scale, listing in the 9 annuals so far issued 42,612 analytics. The following indexes should be noted: v. 3, no. 3 1909-10 has general index of societies (but not of analytics) in vols. 1-3, pts. 1-9. v. 3, no. 1, 1901-02, has both an author and a subject index to the analytical material in that issue; this index not continued in other issues, however.

ENCYCLOPEDIAS

A good encyclopedia or collection of encyclopedias forms the backbone of a great part of the reference work in any library. Such books should be selected with great care and used intelligently with full understanding on the part of the reference assistants of the relative merits and defects of the different works. The making of an authoritative up-to-date encyclopedia is a very expensive undertaking, calling for heavy outlay for experienced writers, good editorial oversight, and careful and accurate printing and proofreading. Such work can not be done cheaply and reputable publishers recognize this fact and spend what is necessary to produce an authoritative, well-edited work. As the immediate profits from cheap work are much larger, however, and as the ordinary buyer often does not discriminate between good and poor encyclopedias, unscrupulous publishers will sometimes utilize cheap hack writers or reprint with only slight changes, old, out-of-date material and thus produce encyclopedias which are only made to sell, and which from the point of view of any real authority are nearly worthless though perhaps costing the library almost as much as the really good works. An encyclopedia should never be purchased without a full knowledge of its character and rigid examination of the book itself. If the librarian does not have the requisite knowledge, purchase should be deferred until the book has been examined and reviewed by an expert, otherwise library money may be wasted. If the library can possibly afford the initial outlay, a good expensive encyclopedia may be the cheapest in the long run, but if this cannot possibly be afforded; it is better to buy a second-hand copy of the next to the last edition of a thoroughly good work than to buy a cheap new encyclopedia, of the hack-work or commercial type. An encyclopedia that was once good is never entirely superseded, and this fact should be taken into account if the publisher of a new work or new edition offers to allow a discount on the new edition for the return of the old. The small library may be justified in giving up its old edition, but the large library which does much reference work should keep one copy of such older works, which will often be useful. Older encyclopedias are helpful: (1) in supplying information as to the condition or view of a given subject, art, or science at the date when the book was compiled, and (2) in supplying minor biographical and other articles omitted from the later edition to make space for other material.

The three cardinal points which decide the standing of an encyclopedia are: (1) its authority (including the qualities of accuracy, up-to-dateness and completeness), (2) satisfactory mechanical arrangement, which should be such that information actually included in the work can be found easily, (3) the extent to which the encyclopedia sends the reader on to other sources of information, *i. e.*, its bibliographies. In examining an encyclopedia to determine its standing on these three points, note the following: (1) publisher—is he well known, and reputable, or entirely unknown; (2) date, not of publication but of *copyright*; (3) editor—is he capable and has he really edited the book or only allowed the use of his name; (4) general appearance of the book, is it cheap and indicative of hasty and inaccurate work or are both paper and typography good; (5) preface—read publisher's or editor's own statement and try to check up his claims by his accomplishment; (6) authority—are the articles by specialists and signed; (7) are the articles full and adequate, or too brief; (8) bibliographies, are these always given, and in such form as to be usable; (9) arrangement of the work, is it clear, easily used, are there enough cross references; if arranged by large subjects, or not alphabetically, is there an alphabetical index of small subjects; (10) quality of illustrations.

AMERICAN

Encyclopedia Americana; a library of universal knowledge ... N. Y. and Chic. Encyclopedia Americana corp., 1918-20. 30 v. front., illus., plates (part col., part double) ports., maps (part double) double plans, facsim. 26^{cm}. \$180. 031

1st ed. 1903-04, 16 v., unpagged; several partial revisions, especially an edition in 22 volumes, publ. 1912 under the title *The Americana*, which included some new articles and changes in other articles. The 1918-20 edition is a complete revision, reset throughout with much new material. The 1922 printing of this edition shows some changes.

A good up-to-date general encyclopedia covering much the same ground as the *New International* (see below), omitting some names and subjects treated in that work, but including others omitted in the *New International*, especially very recent names and subjects in the fields of science and technology in which fields the *Americana* is often somewhat stronger. Important articles are by specialists, are signed and in general are excellent, although the bibliographies are sometimes uneven and not always adequate. Illustrations are numerous and good, pronunciation is marked and there are numerous short articles on small subjects, including many biographies of people still living. Special features include the long account of the European war, about 450 pages, given under the heading *War*, and the accounts of the history, developments, special features, etc., of the different centuries given alphabetically under the name of the century, *e. g.* Thirteenth, Fifteenth, etc.

Nelson's perpetual loose-leaf encyclopædia ... editor in chief, John H. Finley. N. Y. Nelson, [c1920]. 12 v. col. fronts., illus., plates (part col.) ports., maps (part fold.). 26^{cm} \$96.; new pages \$6. per yr. 031

Articles are much briefer than those in either the *New International* or the *Americana*, and there is much less bibliography. The special feature upon which most stress is laid is the loose-leaf form of the work which enables the publisher to keep the work to date by the issue of new pages to be inserted in the place of, or in addition to, the original pages when changed information and new events make new articles necessary. A date at the bottom of each page shows when it was published, and the new pages are distributed twice a year.

New international encyclopædia. 2d ed. N. Y. Dodd, 1914-16. 23 v. illus. pl. (part col.) ports., maps, plans. 25^{cm}. lib. buckr. \$168. 031

1922 issue, 24 v. \$168. For note on this, see last paragraph of annotation.

Editors: Frank Moore Colby and Talcott Williams.

First edition 1902-04, in 17 vols. A later edition

not entirely revised but with new material and new maps was published in 1907 in 20 vols. Another partial revision in 1912 incorporated the population figures of the United States census of 1910. The 2d edition, 1914-16, is thoroughly revised and reset and contains about 80,000 articles as against the 65,000 of the 1st edition.

An encyclopedia of the best modern type, with adequate and authoritative articles, many good illustrations, and excellent and very useful bibliographies. Important articles are by specialists, minor articles by a capable office staff. Articles are all unsigned, but there is at the beginning of each volume a list of the authors of the principal articles in that volume. Many very small subjects, including even titles of famous works of literature, names of fictitious characters, etc., are given separate treatment, pronunciation is marked, and the system of cross references is good. There are many biographical articles, about 20,000 in all, including articles on persons who have come into prominence during the European war and a considerable proportion of Latin-American biography. The numerous maps are of high grade, well to date and mounted on special "insets" in such a way that they can be removed and replaced by revised maps to be issued as need of change arises and supplied free to subscribers who purchased their sets before 1918. The strongest feature of the encyclopedia, however, is its excellent and usable bibliographies. A special bibliographical feature which is often very useful is the reference, in articles on foreign authors, to translations of their works as well as to the best editions in the original. On the whole, especially for purposes of ready reference the *New International* is the most frequently useful of all encyclopedias in English, although for some English and European subjects and especially for cases where very full and scholarly treatment of a subject is called for the longer articles in the *Britannica* are to be preferred. A supplementary volume, unnumbered, contains courses of reading and study.

In various bindings. For library use the ordinary paper edition bound in library buckram according to A. L. A. specifications is to be preferred.

The 1922 issue is printed from the same plates, with some changes throughout and the addition of a new volume, v. 24, containing: (1) History of the War, a revision and extension, with index, of the War article formerly included in v. 23, (2) Population figures, United States 1920, and Great Britain 1921, (3) Courses of reading, formerly included in the supplement. Changes made in v. 1-23 are of two main kinds: (a) changes in the plates, *e.g.* insertion of 1920 census figures, dates of death in biographies, references from the main alphabet to the War history in v. 24, etc., and (b) new pages added to bring to date some important articles. Not needed in the library which has the 1914-16 issue.

For annual supplement see *New international year book*, under *Annual encyclopedias*, p. 36.

The encyclopedias noted above represent the most used American works of recent or comparatively recent date. An

older work which was once an excellent authority, though now superseded for all except occasional uses, is the American cyclopædia, ed. by George Ripley and C. A. Dana (N. Y. Appleton, 1873-1883. 16 v.). An annual supplement to this, entitled Appleton's annual cyclopædia is still useful. For description see under Annual encyclopedias, p. 36. Another good work, much used in its day but now out of date, is Johnson's universal cyclopædia, especially the edition by Charles Kendall Adams (N. Y., Johnson, 1893-95, 8 v.) and the enlargement of that edition issued under the title Universal cyclopædia (N. Y., Appleton, 1900, etc., 12 v.).

The large standard encyclopedias are to be preferred for most purposes, but some of the many smaller works are occasionally needed, either as substitutes when the large works cannot be afforded, or in addition to the latter for briefer articles or for occasional facts not found in the larger encyclopedias.

Appleton's new practical cyclopedia ... ed. by Marcus Benjamin, assisted by Arthur E. Bostwick, Gerald Van Casteel, George J. Hagar ... New ed. rev. and enl. with history of the World war. N. Y. Appleton, 1920. 6 v. illus. plates (part col.) maps. 25^{cm}. \$30. 031

First edition 1910.

World book; organized knowledge in story and picture, editor-in-chief: M. V. O'Shea, editor: Ellsworth D. Foster, editor for Canada: George H. Locke. Chic. and Toronto, Quarrie, 1919. 10 v. illus. (incl. plans, music) plates (part col.) ports., maps. 25^{cm}. \$46. 031

Paged continuously.

An excellent encyclopedia for readers who are not quite old enough to use the New International.

ANNUAL ENCYCLOPEDIAS

Vol. 1-14 have title: The American annual encyclopædia and register of important events.

No more published.

—A general index to Appletons' annual

cyclopædia, embracing vols. I to XV inclusive, and the years 1861 to 1875. N. Y. Appleton, 1876. 442 p. 25^{cm}.

—An index to Appletons' annual cyclopædia, 1876 to 1887 inclusive. N. Y. Appleton, 1888. 144 p. 25^{cm}.

Other indexes are included in the set as follows: Index to new series v. 1-20, 1876-95, in n. s. v. 20 p. 769-866; Index to 3d series v. 1-7, 1896-1902, in 3d ser. v. 7 p. 845-66.

Originally published as an annual supplement to the American cyclopædia. Of little use now as a supplement, but still very useful as an independent publication, especially for the following: (1) for record of the events of a given year, especially the political, governmental, economic and military events, which are given with greater detail in this year by year record than in later general accounts; volumes covering the Civil War and Reconstruction periods are especially useful to students of American history; (2) for many comparatively minor articles, particularly obituaries and biographies, which are either omitted from later encyclopedias or given briefer treatment than in the annual volume for the year when the person was of especial interest.

International year book; a compendium of the world's progress. . . . 1898-1902. N. Y. Dodd, [1899-1903] 5 v. illus., pl., ports., maps. plans, fac. sim. 25^{cm}. \$4. per vol. 031

Covers much the same ground as last five volumes of Appletons' annual cyclopædia, but includes some different material and presents it in a different arrangement, *i. e.* one straight alphabet. The last volume contains a general index to the set.

New international year book; a compendium of the world's progress, 1907-1921. N. Y. Dodd, 1908-22.* v. 1-15. pl. ports., maps. 26^{cm}. \$6.75 per vol. 031

Editor: F. M. Colby.

Planned as a supplement to the New international encyclopædia, volumes 1907-13 supplementing the first edition, volumes 1914-, the second edition. The volume for 1907 contains, in addition to the record for that year, brief summaries of the events of 1903-06. An excellent annual encyclopedia, compiled and arranged on the same plan as the New international encyclopædia and useful both as a supplement to that work and as an annual record of the progress and events in any subject. Especially useful for biography.

BRITISH

Encyclopædia Britannica; a dictionary of arts, sciences, literature, and general information. 11th ed. Camb. [Eng.] & N. Y. Univ. press, 1911. 29 v. illus. pl. (partly col.) maps. 30^{cm}. 032

Amer. ed. cloth v. 1-32, incl. the 3 new vols., \$153. v. 1-28, A-Z; v. 29, Index.

The most famous encyclopedia in English and for some purposes the best. The first edition was

published in 1771 and the ninth edition (the last complete revision before the present eleventh edition) in 1875-88; the tenth edition, published 1902-03 was not a revision of the whole work but merely a 10 volume supplement to the 9th edition issued to bring that edition more nearly to date and linked to it by a general index, vol. 35. The old Britannica type, which persisted through the 9th edition, called for a collection of important monographs on large subjects, by specialists, often very scholarly and important, with good bibliographies, good illustrations, but with no separate treatment of small subjects and no biographical sketches of living persons. Small subjects were treated only as parts of larger subjects and could be found only through the index. This plan was modified somewhat in the supplementary 10th edition and still more, to meet modern demands, in the 11th edition.

The 11th is based upon the 9th and 10th editions but revised throughout, rearranged and with much new material added. The features to be noted are: (1) long signed articles by specialists with (2) excellent bibliography appended to most articles; (3) many excellent illustrations, both in the text and in black and white plates and some colored plates; (4) inclusion of many smaller subjects not separately treated in earlier editions and (5) inclusion of biographical articles on persons still living; (6) very detailed index of small subjects; (7) almost equal up-to-dateness of all parts of the alphabet due to a nearly simultaneous completion and publication. Pronunciation is not marked. In general the articles are excellent but a few show insufficient revision of earlier material especially in the bibliographies. A point which makes for inaccuracy in quick reference work, unless the reference worker uses the index constantly, is the omission of all "see references" from the body of the book and their inclusion in the index only, although "see also" references are given at the ends of articles. There are some minor differences between the English and American edition, *e. g.* the English edition has clearer impression of most of the illustrations, especially the plates, and American edition gives for American cities the population statistics of the 1910 census instead of the figures of the 1900 census given in the English edition. Issued in two forms, on ordinary paper and on India paper, the latter not recommended for libraries on account of its tendency to cling and fold. The ordinary paper edition was issued in cloth and in three special library bindings: (1) buckram, A. L. A. specifications (2) half morocco, Lib. assoc. [Eng.] specifications (3) half morocco special Chivers binding, this latter for English edition only, and now out of print.

A "handy volume edition" was published in 1915-16 and was sold by Sears, Roebuck and co., Chicago. This edition is an exact photographic reproduction, reduced one-third in size, of the standard edition described above, and the text is not revised or altered in any way. The type is small but very clear, and is usable. The illustrations in the text are reduced in proportion and lose somewhat in the process but the maps and plates

are not reduced at all, as it was found possible, by folding the maps and dividing the illustrations which were formerly grouped on one plate, to keep these illustrations of the same size as in the original edition. This reduced edition is planned for the private purchaser and is not recommended for a library which can afford to purchase the work in its original form, but to the small library with a book fund which does not admit the purchase of the original edition this reproduction offers a fairly satisfactory substitute. It is published in several bindings and on both India paper and ordinary paper but for library purposes the ordinary paper edition is to be preferred. This ed. now sold by the Encyclopædia Britannica Co. at \$71.25, cloth.

Encyclopædia Britannica; the new volumes, constituting, in combination with the twenty-nine volumes of the eleventh edition, the twelfth edition of that work, and also supplying a new, distinctive, and independent library of reference dealing with events and developments of the period 1910 to 1921 inclusive. 1st-3d of the new volumes; v. 30-32. Lond. and N. Y. Encyclopædia Britannica co. 1922. 3 v. illus., plates (part fold., part col.) maps (part fold.) diagrs. 30^{cm}. cloth \$30., half mor. \$37.50. Chivers binding, \$50. **032**

A supplement to the above, bringing the 11th ed. to date and covering new subjects and events since 1909, especially the European War and post war developments. Contains two types of articles, *i. e.* new articles on subjects and persons not treated in the 11th ed., and continuation articles which give volume and page reference to the original article in that edition and then continue it for later information and events. Includes a large amount of biography. A variation in plan from the 11th ed. is the inclusion of the "see references" in the main alphabet. Prepared under the same editorial direction as the 11th ed., with a special editor for American subjects, and a list of contributors which, while largely English and American, contains also writers from the principal European countries. The index at the end of v. 32 covers only the new volumes; for articles in the 11th ed. the special index vol., v. 29, must still be used.

To be issued also in the Handy volume ed.

Everyman encyclopædia, ed. by Andrew Boyle. Lond. Dent, N. Y. Dutton, [1913]. 12 v. illus. 17^{cm}. 18s. \$18.00. **032**

A good small encyclopedia for the private library or small library which cannot afford a larger work. The articles are concise and generally accurate, although American subjects are treated somewhat less adequately than English. Bibliographies often omitted but when given are generally good. Few illustrations. A good work for the price but not a substitute for one of the larger standard encyclopedias.

Among the old English encyclopedias occasionally used may be mentioned:—

English cyclopedia, ed. by Charles Knight (1854–62, 22 v. and Suppl. 1869–73, 4 v.).

Penny cyclopedia (1833–43, 27 v.).

Encyclopædia Metropolitana (1817–45, 30 v.).

La grande encyclopédie, inventaire raisonné des sciences, des lettres et des arts, par une société de savants et de gens de lettres; sous la direction de MM. Berthelot, Hartwig Derenbourg, etc. Paris, Lamirault, 1886–1902. 31 v. illus., col. pl., maps (partly col.) 31^{cm}. **034**

Now sold by Larousse, 1600 fr.

Secrétaire général: v. 1–18, F. Camille Dreyfus; v. 19–22, v. 23–31, André Berthelot.

Vol. 23–31 published by Société anonyme de La grande encyclopédie.

The most important French encyclopedia and one of the best encyclopedias in any language. Has authoritative signed articles, excellent bibliographies, many entries under small subjects. Somewhat out of date now for sciences, etc., in which there have been recent developments, but an excellent authority for other subjects, especially for mediaeval and renaissance subjects, and for literature, history, biography, etc., of continental Europe. Very good for French and other continental biography. The bibliographies are especially important. Has fewer illustrations and plates than recent English or American encyclopedias, but what there are, are good.

Larousse, Pierre Athanase. Grand dictionnaire universel du xix^e siècle français. Paris, Larousse, 1866–90. 17 v. 32^{cm}. 1600 fr. **034**

v. 1–15, A–Z; v. 16, suppl. A–Z; v. 17, suppl. A–Z.

A famous encyclopedia, well edited and well written, once of first importance and still useful in many cases if allowance is made for the fact that it is not up to date and must be checked, on important points, by occasional reference to more recent authorities. Combines the features of dictionary and encyclopedia, and as an encyclopedia is an extreme example of entry under small subject, including many articles, some of considerable length, on individual works of literature, *e. g.* poems, plays, novels, romances, etc., and a very large amount of minor biography not included in other general encyclopedias. Good for questions of European literature, biography and history. Pink index pages referring to articles in the two supplements have been issued for insertion at the back of each of the original 15 volumes. As these were not issued until after the publication of the supplements they are not included in earlier sets, but may be purchased separately and inserted; price 3.50 fr.

—Nouveau Larousse illustré, dictionnaire universel encyclopédique. Paris, Larousse, 1898–1906. 8 v. illus. pl. (some col.) maps. 32^{cm}. 800 fr. **034**

v. 1–7, A–Z; v. 8, suppl.

Not an abridgment or revision of the above, but an entirely new work of a more popular character, with briefer articles, and profusely illustrated in both black and white and colors. Preserves much of the old Larousse feature of separate treatment of very small subjects. Especially useful for certain kinds of questions about works of art, as one of its special features is the inclusion of separate articles on individual works of art, *e. g.* paintings, statues, etc., entered under their titles or subjects, and accompanied by small but usable illustrations. Contains a large amount of biography but comparatively little bibliography. For popular, not scholarly use.

—Larousse mensuel illustré, revue encyclopédique universelle, pub. sous la direction de Claude Augé, 1907-22. Paris, Larousse, 1907-22. v. 1-5. illus. 32^{cm}. 35 fr. per year. **034**

v. 1, 1907-10; v. 2, 1911-13; v. 3, 1914-16; v. 4, 1917-1919; v. 5, 1920-.

An excellent monthly supplement to the Nouveau Larousse, with the same size and style of page, but with longer articles and larger illustrations. Each monthly number is alphabetical, there are annual indexes for each year, to be used until a volume is completed, and a final alphabetical index for each volume. Articles are well up to date and numbers are issued promptly. Good work for contemporary French biography, obituaries, portraits, etc. The issues for 1914-18 contain many articles on current history of the European war, military art and science, terms, maps of battles and campaigns, etc.

A combined index for v. 1-5 is in preparation.

—Larousse universel. Directeur, Claude Augé. Le dictionnaire d'après guerre. Paris, Larousse, 1921-22. v. 1-. illus. (incl. ports.), plates, maps, music, diagrs. 30^{cm}. compl. work, 165 fr. **034**

Issued in fascicules, 1921-; v. 1, A-K. To be completed in 2 vols. Many be subscribed for in either fascicules or completed vols.

A new, up to date work, intermediate in size and treatment between the Nouveau Larousse, and the Petit Larousse. Contains a large number of very concise articles, profuse illustration, and many biographies, including many contemporary names not found in the Nouveau Larousse. Biographical sketches are very brief.

Encyclopédie universelle du xx^e siècle. Paris, Librairie nationale, 1908-10. 12 v. 34^{cm}. 650 fr. **034**

A recent work of a more popular character than La grande encyclopédie; not so scholarly as the latter but occasionally useful for some subjects, minor or recent biography, etc., not treated in La grande encyclopédie or Larousse.

DICTIONARIES

For a general survey of the whole field of language dictionaries consult the article "Dictionary" in the *Encyclopædia Britannica*, 11th edition. This is valuable for its historical information, but the appended bibliography has not been sufficiently revised to include the best recent dictionaries of the various languages.

ENGLISH LANGUAGE

For an interesting and authoritative survey of the history and development of the English dictionary consult Sir James A. H. Murray's *Evolution of English lexicography*, Ox. Univ. press, 1901, 51p.

Dictionaries are the main sources for information about words, their spelling, pronunciation, meaning, derivation, etc. Theoretically the dictionary is concerned only with the word, not with the thing represented by the word, differing in this respect from the encyclopedia which gives information primarily about the thing. Practically, however, the large modern dictionary is very often encyclopedic and gives information about the thing as well as the word, thus combining the features of the two types of reference books. As the large English dictionary is the most familiar "family reference book," this encyclopedic feature has been continually strengthened by the addition of many special lists and excellent illustrations, until the best modern works of this sort can now be used for many more purposes than information about words. Dictionaries which contain many illustrative quotations can often be used to find or identify a quotation, thus supplementing the special dictionaries of quotations. The student of reference books should familiarize himself with the special features and supplementary lists of each of the great dictionaries if he is to make each of these books serve all the purposes that it can be made to serve.

Dictionaries should be purchased cautiously. Like encyclopedias they are expensive undertakings for the publisher, and an unscrupulous publisher may try to increase immediate profits by using cheap work, by reprinting without revising some older work the copyright of which has expired, or by other unjustifiable measures. The prospective buyer should use the same care as recommended in the case of encyclopedias.

In studying an English dictionary the student should follow the general directions for examining reference books, and should also note carefully the following points: (1) period of the language covered; (2) vocabulary—extent and how counted, special elements included, *e.g.* slang, dialect, scientific terms, etc.; (3) treatment of each word with reference to (a) spelling, (b) syllabication and hyphenization, (c) pronunciation, (d) etymology, (e) history, (f) definition, (g) illustrative quotations—are they given freely and with exact reference, (h) standard and usage—is a word indicated as obsolete, colloquial, etc., (i) encyclopedic information, (j) synonyms, antonyms; (4) illustrations; (5) special types of words included in addition to the ordinary vocabulary, *e.g.* Christian names, foreign phrases, geographical names—to what extent are these included and where, *i.e.* in separate lists or in the main vocabulary; (6) special features and treatment—does the dictionary stand especially for any one thing, historical information, simplified spelling, etc.

Dictionaries of the English language have been divided rather arbitrarily, according to their place of compilation and publication, into American dictionaries and English dictionaries. Of course both types cover the same field, the English language as a whole,

and conform in the main to the same standards, but there are certain minor differences. In cases where there are differences in spelling, pronunciation, meaning, etc., each dictionary will generally give both usages, but the English work will prefer the English usage or form, while the American work will prefer the American. An American dictionary generally includes more Americanisms, an English dictionary more local English terms and colonial words.

AMERICAN

For a detailed study and comparison of the principal American dictionaries consult American dictionaries, by Stewart Archer Steger, Baltimore, Furst, 1913, 131 p.

Century dictionary and cyclopedia with a new atlas of the world. N. Y. Century co. [c1911] 12 v. illus. pl. (partly col.) maps, charts. 31^{cm}. o. p. **423**

Published and originally sold by Century co., but no longer handled by that firm.

First edition 1889-91, 6 v., with two supplementary volumes, *Cyclopedia of names*, 1894, and *Atlas* 1897; partially revised from time to time and plates altered by the cutting out of some of the original material and the insertion of new information, but never entirely revised and reset. Revisions to note especially are: (1) Edition of 1901, 10 v., v. 1-8, Dictionary, v. 9, Names, v. 10, Atlas; (2) two supplementary volumes published 1909, numbered v. 11-12 to continue the 1901 edition and containing about 100,000 new words, senses, and phrases and a 92 page supplement to the *Cyclopedia of names*; and (3) the 1911 edition, 12 v.

Contents: v. 1-10, Dictionary; v. 11, *Cyclopedia of names*; v. 12, Atlas.

Printed from the same plates as the earlier editions but with alterations in the plates to include a considerable amount of new material. In addition there is bound at the end of each volume the corresponding portion of the alphabet from the two supplementary volumes published in 1909, making two alphabets in each volume linked together by cross-references.

The most comprehensive and detailed American dictionary and the best example of the encyclopedic type. Its special features are its free inclusion and careful treatment of the technical terms of the various sciences, arts, trades and professions, its excellent illustrations and plates, and, particularly, the large amount of encyclopedic material included. This last feature makes the work almost as much an encyclopedia as a dictionary.

Standard dictionary. Funk and Wagnalls new standard dictionary of the English language, prepared by more than 380 specialists and other scholars under the supervision of I. K. Funk, Calvin

Thomas, F. H. Vizetelly. N. Y. Funk, 1913. 2916 p. illus. pl. (partly col.) por. facsim. 31^{cm}. Buckr., \$16., sheep, \$20.; half goat, \$24.; for price of the 2 vol. ed. and also the "subscription" ed. apply to the publisher. **423**

First edition 1893 had title *Standard dictionary*; a new edition, 1901, had 85 pages of addenda containing 13,000 new words but was otherwise printed from the same plates as the first edition; the New Standard is a thorough revision of the 1893 edition, reset and printed from new plates throughout.

Contents: (1) Dictionary, including in one alphabet all ordinary dictionary words and also the various proper names, *i. e.* biographical, bibliographical, geographical, mythological, biblical, etc., which were given in separate lists in the first edition; (2) Appendix: Disputed pronunciations, Rules for simplified spelling, Foreign words and phrases, Statistics of population, History of the world day by day (this last in "subscription ed." only).

A serviceable one volume work, the most recently revised of American dictionaries and therefore often the most useful for new words. Its special feature is emphasis upon current information, *i. e.* present day meaning, pronunciation, spelling, and the subordination of the historical to the current information. Full vocabulary, about 450,000 words including 65,000 proper names, aims to include all live words of the language in standard speech and literature of the day and terms commonly used dialectically by large numbers of people in different parts of the English speaking world. Prefers simpler spelling and when several forms are used by authorities indicates those used by American philological association, American spelling reform association, and Simplified spelling board. Marks syllabication and hyphenated words plainly, using single hyphen for the first and double hyphen for the second; indicates pronunciation by two respellings (1) by the scientific alphabet, N.E.A., and (2) by the ordinary respelling used in textbooks. Gives antonyms as well as synonyms. Contains considerable encyclopedic information and many illustrations and good colored plates.

Published in both a "regular" and a "subscription" edition. The regular edition does not contain the appendix "History of the world day by day."

Contents: (1) Dictionary, including in the same list both the usual dictionary words and also foreign phrases, abbreviations, proverbs, noted names of fiction and all proper names except those in the biographical and geographical lists; (2) Appendix: (a) Pronouncing gazetteer, (b) Pronouncing biographical dictionary, (c) Arbitrary signs used in

writing and printing, (d) Classified selection of pictorial illustrations. In addition to the foregoing the "Reference history edition" contains a separately paged supplement "Reference history of the world" by A. B. Hart, c. 1921; earlier issues have "Reference history" by J. C. Ridpath and H. E. Scudder.

The oldest and most famous American dictionary, a good all round dictionary with no marked specialization or bias, well edited, reliable, and noted particularly for the clearness of its definitions. The most used, and for general purposes the most useful, of the one volume dictionaries, although as it has been less recently revised than the New Standard it is less useful than that work for very recent words or meanings. A special feature in the arrangement is the divided page, containing in the upper part the main words of the language and in the lower part, in finer print, minor words, foreign phrases, abbreviations, etc. Contains considerable encyclopedic matter, about 6,000 illustrations and a number of good colored plates.

Murray, Sir James Augustus Henry. New English dictionary on historical principles. Ox. Clarendon press, 1888-1921. 10 v. 33^{cm}. v. 1-9. £36, 10s. v. 10, incomplete, 2s. 6d. per section (64 p.). **423**

v. 1-8, A-Th, complete; 1. 10, Ti-Z, incomplete.

Known variously as Murray's dictionary, the New English dictionary, and the Oxford dictionary. For history of the work see preface to volume one, and also Murray's Evolution of English lexicography.

The great dictionary of the language, compiled on a different plan from any of the other standard English dictionaries and serving a different purpose. It is based upon the application of the historical method to the life and use of words and its purpose is to show the history of every word included from the date of its introduction into the language, showing differences in meaning, spelling, pronunciation, usage, etc., at different periods of the last 800 years, and supporting such information by numerous quotations from the works of more than 5,000 authors of all periods, including all writers whatever before the 16th century and as many as possible of the important writers since then. The vocabulary is very full, and is intended to include all words now in use or known to have been in use since 1150, excluding only words which had become obsolete by 1150. Within these chronological limits, aims to include: (1) all common words of speech and literature, and all words that approach these in character, the limits being extended further into science and philosophy than into slang and cant; (2) in scientific and technical terminology, all words English in form except those of which an explanation

would be intelligible only to a specialist, and such words not English in form as are in general use or belong to the more familiar language of science; (3) dialectal words before 1500, omitting dialectal words after that date except when they continue the history of a word once in general use, illustrate the history of a literary word or have a literary currency. Words included are classified as (1) main words, (2) subordinate words, (3) combinations; information for all main words is entered under its current modern or most usual spelling, or if obsolete under most typical later spelling, with cross references from all other forms. Information given about each main word is very full and includes (1) Identification, including (a) usual or typical spelling, (b) pronunciation indicated by respelling in an amplified alphabet or in case of obsolete words by marking of stress only, (c) grammatical designation, (d) specification, *e. g.* musical term, etc., (e) status, if peculiar, *e. g.* obsolete, archaic, etc., (f) earlier spelling, (g) inflexions; (2) Morphology, including derivation, subsequent form history, etc., (3) Signification, arranged in groups and historically, with marking of obsolete senses, erroneous uses, etc.; (4) Quotations, arranged chronologically to illustrate each sense of a word, about one quotation for each century, given with exact reference.

The most important use of this dictionary is for historical information about a word but it has many other secondary uses; *e. g.* while not intentionally encyclopedic it has a good deal of encyclopedic information including some not given in other dictionaries, and while not specializing in slang it does include many colloquial and slang words, Americanisms, etc., and where such words are included the information is often better than in the special slang dictionaries.

Fowler, Henry Watson. Concise Oxford dictionary of current English adapted by H. W. Fowler and G. E. Fowler. Ox. Clarendon press, 1911. 1041 p. 19^{cm}. 6s. \$3.75. **423**

Includes words in current use or preserved in much used quotations or proverbs, scientific and technical terms that are current in general speech but are not purely learned terms, and many colloquial, facetious, slang and vulgar expressions. An excellent small desk dictionary, based upon the work done for the New English dictionary.

Etymology

For the etymology of the English language, the best authority, so far as it has been published, is Murray's New English dictionary. A smaller but very useful work and the standard special dictionary is:

FOREIGN LANGUAGES

Foreign dictionaries are important in any library, though their use will vary greatly according to the size and type of the library and the character of the library clientèle. The needs of the small library used by English speaking readers will be met by a modest equipment of French, German and Latin dictionaries, while the small or branch library in a locality which has a considerable immigrant population will need also the dictionaries of the languages of these immigrants. Large public libraries and especially university libraries need the best dictionaries of all principal languages and many minor languages.

Two main types of dictionaries are represented in the following list: (1) the standard dictionary of a language in that language only, such as Littré's French dictionary, and (2) the bilingual dictionary, such as the various French-English and German-English dictionaries. The first type is the more complete and must be

consulted when the fullest vocabulary or detailed and historical information is needed, but it can be used only by someone fairly familiar with the language, and is not needed generally in the smaller library. The second type, which is the most used kind in the average library, is planned for people who are learning a language, is much less complete in vocabulary and contains generally no historical information, as its main purpose is not detailed definition but the explanation of a foreign word by its English equivalent. The ordinary bilingual dictionary is generally very satisfactory for most words of the "literary" language but is often weak in scientific terms and popular expressions. Bilingual dictionaries differ greatly also, according to the users for whom they are compiled. In a French-English dictionary prepared for the use of English speaking students who are learning French, the French-English half of the book is the more important and this will be worked out very carefully, while the English-French half may be given briefer or less careful treatment. The reverse is true of a dictionary prepared for French students learning English. In that case the English-French half is more important and will generally be fuller and better than the French-English half. A library which can afford to have several dictionaries of a language should take this difference into account and represent both points of view.

As so large a proportion of the use of foreign dictionaries in an American library is for the purpose of finding the English meaning of a foreign word, the many other possible uses of such books are sometimes overlooked. The larger dictionaries frequently contain some encyclopedic information, those that include many quotations may often be used to supplement the dictionaries of foreign quotations, and the larger historical or dialectal dictionaries which include obsolete words, local usages, etc., may be used for information on small points of local history, manners and customs, folk lore, etc.

v. 1-4¹ pts. 1-4, A-Gezwang, 4²-10¹, H-Sprechen, complete; rest of alphabet incomplete.

"In the Deutsches wörterbuch of Jacob and Wilhelm Grimm the scientific spirit . . . first found expression in general lexicography . . . Their design, in brief, was to give an exhaustive account of the words of the literary language (New High German) from about the end of the 15th century, including their earlier etymological and later history, with references to important dialectal words and forms; and to illustrate their use and history abundantly by quotations . . . The scope and methods of this dictionary have been broadened somewhat as the work has advanced. In general

it may be said that it differs from the New English dictionary chiefly in its omission of pronunciations and other pedagogic matter; its irregular treatment of dates; its much less systematic and less lucid statement of etymologies; its less systematic and less fruitful use of quotations; and its less convenient and less intelligible arrangement of material and typography." *Encyclopaedia Britannica*, 11th ed. 8:189.

This encyclopedia is one of the most important reference books on its subject in English, superseding the older work by M'Clintock and Strong, except for an occasional special article. Based upon the 3d ed. of the *Herzog-Hauck-Real-encyklopädie*, and so Protestant in tone, but not biased. Is not a mere translation of the German work, however, as much of the material has been condensed, fresh material added and the bibliographies extended and improved. Is not limited to the Christian religion but includes articles on other religions and religious leaders. Covers the whole field of biblical, historical and contemporary theology, church history and religious biography, including separate articles on all sects, denominations and churches, organizations and societies, missions, doctrines, controversies, etc. Biographical notices include those of men still living. The strongest feature of the work is the bibliographical feature which is in three forms—(1) an excellent general bibliographical survey, with critical comment, in the preface (xii-xxiv), (2) the bibliographical appendix at the beginning of each volume which gives recent literature, and (3) the fine bibliographies appended to each article.

The most extended modern work of reference in the field of theology is the great French series now in course of publication under the general title *Encyclopédie des sciences religieuses*, composed of the following separate works:

Dictionnaire d'archéologie chrétienne, by Cabrol; *Dictionnaire d'histoire et de géographie ecclésiastiques*, by Baudrillart; *Dictionnaire de théologie catholique*, by Vacant and Mangenot; *Dictionnaire de la Bible*, by Vigoroux, and *Dictionnaire du droit canonique*, (this last in preparation but not yet published). Parts of this series contain the finest material on the subject published in any language and the work as a whole represents the highest level of French Catholic scholarship. The price of the sets puts them beyond the reach of the small or medium-sized library and the work is too special to be of much use except in a theological library, a large general reference library or a library which specializes in mediaeval and ecclesiastical history and literature. For historical subjects the two dictionaries by Cabrol and Baudrillart are the most useful

of the series. For fuller description see below and also p. 58.

Baudrillart, Alfred. Dictionnaire d'histoire et de géographie ecclésiastiques, par Alfred Baudrillart, Albert Vogt et Urbain Rouziès. Paris, Letouzey, 1912-21. v. 1-3. (fasc. 1-14). illus. maps. 28^{cm}. 5 fr. per fasc. **203**

Publication in fascicles was begun in 1908; v. 2 was completed in 1914, and three fascicles of v. 3 have been issued also, completing more than half of the letter A. Scope of work covers all subjects in history of the Roman Catholic church, and other churches as they affect the Roman church, from the beginning of Christianity to the present time. The geographical material includes separate articles or towns and other small divisions, past and present, indicating the connection of the place with ecclesiastical history, its present ecclesiastical status, a list of its religious institutions, and, in case it is or has been an episcopal see, a list of the bishops, etc. There are biographical articles on all important and some minor names in the Roman Catholic church, members of other churches who have had any effect on the Roman church, all ecclesiastical and theological writers, saints in the Russian and other churches, ecclesiastical musicians, artists, etc. Signed articles, good bibliographies.

Covers period to the age of Charlemagne. Long signed articles; bibliographies. Not abreast of modern scholarship but still useful on many points.

Signed articles by specialists, with bibliographies. Prepared with the co-operation of many foreign scholars, primarily for the scholar and professional Bible students. Standpoint is that of the advanced higher criticism.

Hastings, James. Dictionary of the Bible, dealing with its language, literature, and contents, including biblical theology. Edin. Clark; N. Y. Scribner, 1898-1902. 5 v. illus. maps. 28^{cm}. **220.3**

Eng. ed., Edin. Clark, 28s per vol.

v. 5 is an "extra" or supplementary volume, containing indexes, maps and some articles not alphabetically arranged.

Signed articles, bibliographies. From a less advanced point of view than Cheyne and intended for use by the general reader as well as the professional Bible student.

In comparing the two works by Cheyne and Hastings the *Nation* says: "The one [Cheyne] is an international undertaking which will be accepted and quoted on the continent of Europe as well as in England and America; the other is adapted for the use of the English-speaking peoples. The one appeals to scholars and specialists; the other more to the body of the Christian church. It will be the boast of some articles in the one that they give the best presentation of their subjects that exists in English; it is true of many articles in the other that they give the best short presentation that exists in any language."—*Nation*, 70:246.

—Dictionary of the Bible, ed. by James Hastings, D.D., with the co-operation of John A. Selbie, D.D., and with the assistance of John C. Lambert, D.D., and of Shailer Mathews, D.D. N. Y. Scribner, 1909. 992 p. 4 maps (2 double) 26^{cm}. \$7. **220.3**

Eng. ed., Edin. Clark, 21s.

An excellent one volume dictionary; an independent work, not a condensation of Hastings' larger work.

—Dictionary of Christ and the gospels. N. Y. Scribner, Edin. Clark, 1906-08. 2 v. map. 28^{cm}. 52s. **225.3**

Complementary to Hastings' Dictionary of the Bible. Purpose is to give an account of (1) everything relating to the person, life, work, and teaching of Christ, whether found in the Gospels or elsewhere, and (2) everything contained in the Gospels. Planned especially for preachers; most of the articles written by men who are or have been preachers. Signed articles; bibliographies.

—Dictionary of the Apostolic church. N. Y. Scribner, Edin. Clark, 1916. 2 v. 28^{cm}. 52s. **225.3**

A continuation of his Dictionary of Christ, doing for the rest of the New Testament what the Dictionary of Christ does for the Gospels.

In two alphabets: (1) the canonical books, (2) the apocrypha. Written from a strongly conservative, and, in the case of the Old Testament articles, a reactionary point of view. Good illustrations.

"On subjects which do not require critical judgment this dictionary is valuable, but for historical study, based on literary appreciation of the documents, it is misleading."—*Nation*, 90:323.

An older standard work, not now in line with the most recent results of modern scholarship but still useful for many purposes.

EDITIONS

While the Bible itself is not a reference book in the ordinary sense of the word, at least one copy or edition will be needed in even the small reference collection. The first to be purchased should be a good

parallel text edition of the Authorized, or King James version, and the Revised version; a good edition is the Riverside parallel Bible (Bost. Houghton, \$5.). To this should be added a copy of the Douay Bible, the authorized Catholic translation from the Latin Vulgate; a good edition is published at Baltimore, by Murphy, \$1. A convenient collection of various English translations of the New Testament is: The English Hexapla, exhibiting the six important English translations, Wiclif 1380, Tyndale 1534, Cranmer 1539, Geneva 1557, Anglo-Rhenish 1582, Authorized 1611, and the original Greek text (Lond. Bagster, 42s. o. p.).

Larger reference collections will need copies of the Latin Vulgate (good edition Milan, Hoepli, 1914, 12L.), and of the Greek text; good editions of the latter are: Old Testament in Greek, ed. by Henry Barclay Swete (Cambridge Univ. press, 3 v. 30s.) and the Parallel New Testament Greek and English, with the original Greek as ed. by F. H. A. Scrivener (Cambridge, Univ. press. 14s. 6d.)

v. 16 pub. by the Encyclopedia Press, Inc., and set now handled by that firm.

v. 1-15, A-Z, Errata; v. 16, Additional articles; Index; v. 17, Supplement.

"It differs from the general encyclopedia in omitting facts and information which have no relation to the Church. On the other hand, it is not exclusively a church encyclopedia, nor is it limited to the ecclesiastical sciences and the doings of churchmen. It records all that Catholics have done, not only in behalf of charity and morals, but also for the intellectual and artistic development of mankind." *Preface.*

Authoritative work with long signed articles by specialists, good bibliographies and illustrations. Very useful for many questions on subjects in mediaeval literature, history, philosophy, art, etc., as well as for questions of Catholic doctrines, history, biography. The standard work in English, but for very full information often not so good as the great French Catholic works.

A special ed., c1913-14, issued "under the auspices of the Knights of Columbus Catholic truth committee" is on thinner paper and has indistinct impressions of many of the illustrations in the text.

A classified subject list with alphabetical indexes, listing both the book and periodical literature of the various subdivisions of the social and political sciences. The most complete current bibliography of the subject, containing a large amount of valuable material but difficult to use quickly because of lack of cumulations. Useful annotated list.

For ordinary purposes the most useful bibliographies in the field of the social sciences are the various "selected lists" issued by the Library of Congress and revised as needed. These contain references to the best book and periodical literature on their subjects and already cover about seventy different subjects, including such topics as child labor, parcels post, political parties, monetary question,

trusts, tariff, etc. For a complete list of these bibliographies see the following:

U. S. Library of Congress. Publications issued by the library since 1897. Oct. 1920. Wash. Govt. print. off. 1920. 56 p.

The New York public library has also published useful bibliographies on subjects in social science, including lists on bi-metallism, constitutions, criminology, economic and social aspects of war, marriage and divorce, minimum wage, money and banking, political parties, political rights, government control of railroads, etc. These lists, which are printed in the *Bulletin of the New York public library* and reprinted as separates, are usually longer than the Library of Congress selected lists, and are very useful when full lists are wanted. For briefer lists the bibliographies given in the *Debater's handbook* series and the *Handbook* series are often serviceable. See under *Debates*, p. 26.

STATISTICS

Reference questions calling for statistics are frequent in any library, and reference books which furnish reliable and up-to-date statistics are of great importance in any reference collection though their use is greatest in libraries where original research on social, political, economic, or industrial questions is done. Statistical reference books fall into four main classes: (1) general dictionaries or compends (2) almanacs or annuals of miscellaneous statistics and general information (3) census reports or bulletins (4) national year books and statistical annuals limited to the figures of some particular country. Of these four classes the first and second are of easiest and most frequent use for popular questions and are very useful within their own field, but they are usually neither detailed or authoritative enough for important questions. The third class is always official (*i. e.* prepared by a government), and the fourth class is usually official also, and both are generally reliable for important questions. The fourth class is expensive to keep up if anything like a complete collection is attempted and its principal use is therefore in the library of some size.

"The volumes numbered I—XI, constituting the complete reports of the census, are being issued in a very limited edition, intended chiefly for libraries, institutions and special students of statistics.

"A condensed report, entitled Abstract of the census, has been printed in a much larger edition, intended for more general distribution and prepared in such a way as to meet the needs of most persons. . . . It contains in tabular form all important census statistics for the U. S. as a whole and for each state and principal city, together with a brief text explaining their meaning. The Abstract therefore, is a condensation of the complete census reports, both tables and texts, and not merely a compilation of tables.

"The Abstract is issued in special editions for each of the several states, each edition containing a supplement giving the detailed statistics for counties, cities, and other civil divisions of the state to which it relates, designed to meet the needs of persons resident in that state or especially interested in it. The supplement contains also both tables and text.

"As a compact reference book . . . the Abstract is more convenient for most persons than the voluminous final reports." *Announcement, 13th Census*, v. 11.

Each library should secure the Abstract in the special edition for its own state. The supplements of state statistics are also issued separately in pamphlet form. The large library will find it convenient to secure all of these and bind them up alphabetically, thus securing an arrangement of the complete statistics by states, as well as the arrangement by large subjects given in v. 1-11 of the Reports. Supplements omit occupation statistics.

LAW

Few general libraries can buy many law reference books, as such books are very expensive and are often so technical in character that they can be used intelligently only by lawyers or law students. State and legislative research libraries and some university libraries will naturally include special law collections but most general libraries should buy only such law books as are needed for the less technical legal topics, referring all other questions to the nearest law library. A few law reference books must however be included in the reference collection of any general library of fair size as they are needed not only for the more general law questions but also for many questions in the field of history and the various social sciences. The minimum equipment for such reference work should include: (1) a good law dictionary; (2) a set of the United States statutes either (a) the "Revised statutes" with supplements, and subsequent volumes of the "Statutes at large" and

"Pamphlet laws," or (b) the "Compiled statutes," or (c) "Federal Statutes Annotated," or (d) for the smaller library, either the compiled statutes, compact edition, or Barnes' Federal code; (3) the latest revision or compilation of the laws of the home state, with subsequent session laws; (4) the charter and ordinances of the home city; (5) the latest compilation of the United States "Treaties in force," and Moore's Digest of international law.

To this minimum the library would add, as public demand and library funds justified, one of the large law encyclopædias and, if the library contains many legal periodicals, the indexes of legal periodicals described on p. 13.

v. 1, 1874-91; v. 2, 1892-1901.

"In 1867 a commission was appointed to revise the laws, by discarding all of merely private interest and all which had become obsolete, and arranging the general and permanent laws under headings by which related subjects were brought together. The Commission reported a revision which was accepted and published, and is known as the Revised statutes of 1875. Soon after its publication it was discovered that the revisers had taken liberties with the text. In consequence, Congress appointed a new Commission to revise the work by striking out the substituted words of the first commission and restoring the original text. When this work was completed it was published as Revised statutes, 2d edition, 1878. This remains the standard. Supplementary revisions were made and published in 1891 and 1901." *Supt. of documents. COSTUMES

Planché, James Robinson. Cyclopædia of costume; or, Dictionary of dress. Lond. Chatto, 1876. 2 v. illus. pl. sq. 28^{cm}. o. p. **391**

The above is the only English dictionary of the subject and is useful as far as it goes. For many reference questions, however, the large illustrated works such as Racinet's *Le costume historique*, or the various books on national costumes, are more useful. A good list of such works is the following:

Brooklyn. Public library. Reading and reference list on costume. Brooklyn, N. Y. Public library, 1909. 64 p. 22^{cm}. **016.391**

Viollet-le-Duc's *Dictionnaire raisonné du mobilier français* (described p. 116) has several sections on costume, jewelry, armor, etc. Parmentier's *Album historique* contains many illustrations of costumes of various periods, and the other titles listed under Pictorial illustrations, p. 187, are often useful.

SCIENCE

In both science and technology, subjects change and develop so rapidly and the im-

portance of having the most up-to-date information is so great that reference work has to be done largely through the periodicals of the subjects, and the relative importance of encyclopedic reference books is much less than in other subjects. The supply of such reference books, too, is limited. A scientific encyclopedia is out of date for some subjects as soon as it is printed, and needs to be revised so frequently, if it is to be of real service, that publishers hesitate to undertake many such books. In scientific subjects for which there is no reliable encyclopedia, recent treatises, college textbooks, etc., often furnish good substitutes and these as well as the periodical indexes should be used freely.

MATHEMATICS

Encyclopédie des sciences mathématiques pures et appliquées publiée sous les

auspices des Académies des sciences de Göttingue, de Leipzig, de Munich, et de Vienne avec la collaboration de nombreux savants. Édition française rédigée et publiée d'après l'édition allemande sous la direction de Jules Molk. Paris, Gauthier-Villars, 1904-14. v. 1-7. 25^{cm}. incomplete; ea. vol. issued in fascicles, about 5 fr. per fasc. 510.3

Not alphabetically arranged.

The most important encyclopedia of the subject containing long articles by specialists, with full bibliographic notes. For the special student and teacher, not for the untrained reader. Issued in two editions, the French edition noted above, and a German edition begun in 1898 (Lpz. Teubner). The German edition is more nearly completed, but the French edition is better in some ways, some of its sections having been considerably improved and expanded from the German edition. ETHNOLOGY

U. S. Immigration commission, 1907. Dictionary of races or peoples. Wash. Govt. print. off., 1911. 150 p. incl. maps. 23^{cm}. (Reports of the Immigration commission, v. 5) 20 cts. 572

"While this dictionary treats of more than 600 subjects covering all the important and many of the obscure branches of the human family, it is intended primarily as a discussion of the various races and the peoples indigenous to the countries furnishing the present immigration movement to the U. S. or which may become sources of future immigration." *Preface*.

Popular rather than scientific, but useful because it is the only dictionary of the subject in English and because the foreign dictionaries are not up to date. Short articles; general bibliography p. 8-12, but no bibliographies in the text; maps, good cross-references.

Museum handbooks of ethnographical collections are often useful reference aids both for their reliable descriptive matter and their many excellent illustrations. Important examples of such handbooks are:

British museum. Guide to the antiquities of the stone age in the department of British and mediaeval antiquities. 2d ed. London, 1911. 145 p. illus. pl. 22^{cm}. 1s.
— Handbook to the ethnographical collections. London, 1910. 304 p. illus. pl. maps. 22^{cm}. 2s. 571

Also published as v. 2 of his Races of Europe.

AMERICAN INDIANS

"Contains a descriptive list of the stocks, confederacies, tribes, tribal divisions and settlements north of Mexico, accompanied with the various names by which these have been known, together with biographies of Indians of note, sketches of their history, archeology, manners, arts, customs and institutions, and the aboriginal words incorporated in the English language. . . . Accompanying each synonym (the earliest known date always being given) a reference to the authority is noted, and these references form practically a bibliography of the tribe for those who wish to pursue the subject further." *Preface.*

Other publications of the Bureau of American Ethnology contain much valuable reference material on the manners, customs, arts, language, etc., of the native races of North America, and should be used freely for such purposes. For catalogs and indexes see under Public documents, p. 200.

For extended reference work in agriculture and horticulture the publications of the Department of agriculture at Washington and the reports, bulletins, etc., of the various state experiment stations are of first importance. These may be used through the Experiment station record (see under Special indexes, p. 11), and through the general and special catalogs of public documents described in the section on Public documents, p. 199. In libraries specializing in reference work in agriculture the card index of experiment station publications prepared by the Office of experiment stations is very useful, but this is too expensive for the general library which does not specialize in the subject.

MEDICINE

Medical reference books often present a difficult problem in the general library because (1) they are expensive, (2) they are often so technical that they can be used intelligently only by the physician or medical student, and (3) in a miscellaneous library they are sometimes misused by certain types of readers. It is therefore important to buy only the books which are actually needed, and unless the library is maintaining a special medical reference collection it is usually best not to place such books upon the open shelves. This latter restriction applies especially to the large medical encyclopædias, not to the biographical, bibliographical or historical reference books on this subject.

Arranged alphabetically by authors, giving for each brief biographical sketch, full list of works with dates, and references to critical comments or reviews.

Contents: v. 1, 680-1638; v. 2, 1639-1729; v. 3, 1730-1784; v. 4, 1785-1824; v. 5, 1825-1854; v. 6, 1855-1874; v. 7, 1875-1890; v. 8, 1891-1904.

v. 8 has two general indexes (1) authors criticized (2) authors of criticisms.

Primarily a compilation of quoted material not an encyclopedia of original articles. For each author treated gives brief biographical data and then selected quotations from criticisms of his work grouped as (1) personal (2) individual works (3) general.

Extracts are of some length and are given with exact reference, so that the work serves both as an encyclopedia of critical comment and an index of literary criticisms. Very useful to the reference librarian, and in general public library work. In school and college work must sometimes be used with care, as instructors often prefer not to have their students use criticisms of any work until after they have read the work itself.

"The work is not a history, but a handbook. It seeks to record the generally accepted views of scholars on pertinent matters, and does not pretend to offer new theories or investigations." *Preface.*

Gives for each piece listed, its probable date, MS or MSS, form and extent, dialect in which first composed, source or sources when known, bibliography, and comment and abstract also in case of the longer works.

BIBLIOGRAPHY

For most purposes the bibliographies given in the Cambridge history of English literature will be found satisfactory. For many questions the English national bibliographies described in the section Bibliography, p. 210-214, will have to be used, especially those dealing with the earlier periods. The following manual is a useful bibliographic handbook for university students or other advanced workers.

ALLUSIONS

The small reference books called handbooks of information, or books of allusions, are constantly needed for minor reference questions about the various biographical, literary, mythological, geographical and other allusions made by writers. They are also needed by readers who are participating in "puzzle" or "prize question" contests. Books of this type usually give only brief information, are not always accurate, and seldom give authorities. They are useful as first aids, but must be checked by other authorities for important questions. No one book covers the whole field so it is well to keep many books of this type at hand.

ANTHOLOGIES

Anthologies, or compilations of poetical selections, form an important element in any reference collection. Their principal reference use is as aids in finding quickly some one poem, and they are most useful in the case of poems by authors whose collected works are not in the library, or in cases where the reader knows only the title or first line of a poem, and not the author's name. Many anthologies have biographical or bibliographical notes which are often useful. The value of an anthology for reference purposes depends upon the care with which the selection has been made, the number of authors represented, the character of the notes, and the completeness of the indexes which should be such that any poem included can be found if either its author, title, or first line is known. There are so many good anthologies that it is impossible to list all, but the following are among the most useful:

QUOTATIONS

Books of quotations are important in any reference collection for (1) supplying quotable passages from the writings of a given author, (2) suggesting quotations suitable for a given occasion or use, (3) identifying a given quotation. This last is the most frequent and important of the three uses. As every book of quotations is necessarily selective and as each includes something not given in the others, the large library will need all such books which are of any value at all. The small library, however, can get along with a much more limited supply. If it has two, (1) Bartlett, as the best chronological-author list, and (2) Hoyt, as the most useful subject list, it is well equipped for ordinary reference work with English quotations.

The reference value of a book of quotations depends upon three things: (1) the comprehensiveness of the collection and the care and judgment with which the quotations have been chosen; (2) the exactness of reference with which the quotations are given, *i. e.* reference should be not merely to the author, but to the special work, and its chapter, section, stanza, etc.; and (3) the completeness of the index. As the most frequent use of such books is for the purpose of locating a given quotation, the index should include every word in each quotation listed which a reader is at all likely to remember.

CONCORDANCES

Concordances are useful (1) for a study of an author's use of words, (2) as an index (verbal only) to the subject matter of his writings and (3) for locating quotations. For this third use they are an important supplement to the collection of dictionaries of quotations. The most useful concordances are those that are complete, *i. e.* cover not only all of an author's writings but all words used by him, except articles and certain minor words, and all occurrences of each word.

Verbal indexes resemble concordances and may be used for the same purpose but are less easy to use for quick reference because they merely refer to the place where a word occurs and do not quote context. Certain author dictionaries, *i. e.* those which

are dictionaries of language not of subject matter, may also be made to serve as concordances. Examples of dictionaries which may be used in this way are the dictionaries included in the French *Grands écrivains* series.

Information about new concordances projected or finished is given from time to time in the Circulars of the Concordance society.

AUTHOR DICTIONARIES

There are three main types of author dictionaries: (1) dictionary of an author's language, giving definitions and explanations of his use of words; (2) dictionary of characters, places, allusions, etc.; and (3) dictionary, or index, of the subject matter of an author's work. The reference value of a dictionary of any of these types depends upon (1) the completeness, accuracy and information with which the work has been done, and (2) the exactness of the references, which should be made, in every case, to the particular chapter, stanza, scene, etc., in which a given word, character, or subject, is to be found, not merely to the title of the work.

Balzac

Cerfberr, Anatole, and Christophe, Jules. Répertoire de la Comédie humaine de H. de Balzac. Paris. Lévy, 1887. 563 p. 24^{cm}. 7 fr. 50 c. **843**

A dictionary of characters; gives for each character a brief description, indicates its connection with the plot of the story and refers to title of the

novel or story in which the character appears; does not refer to chapters.

This work was crowned by the French Academy. Two English translations have been published as follows:

— Repertory of the Comédie humaine, tr. by J. W. McSpadden. Phil. Avil pub. co., 1902. 522 p. 21^{cm}. (Balzac. Works. Popular libr. ed. v. 36) o. p. **843**

— Compendium, H. de Balzac's Comédie humaine, tr. and ed. by J. Rudd. Phil. Gebbie pub. co., 1899. 583 p. o. p. **843**

Another useful title index which indexes more French editions, but no translations, is given at the head of the Balzac entries in the Catalogue général of the Bibliothèque nationale.

FICTION

Reference books on fiction are needed for finding many things *e. g.* author's name when only title of book is known, lists of novels dealing with special subjects, localities or historical periods, descriptive or critical notes and outlines of plots, the title of the work in which a certain fictitious character appears, the collection or other work in which a story not published separately may be found, etc. The following books will help on most of these points, but the handbooks of allusions and the various author dictionaries must also be used. Printed library catalogs which contain many title and analytic entries are useful, and the indexes of periodicals must often be used for stories and novels printed in periodicals.

016.8

A thorough revision of the first edition, 1903, differing from the first edition by the addition of much new material, the combination of the English, Irish, Scotch and colonial lists under one heading, the extension of the foreign lists, the omission of the historical appendix and the combination of the indexes. There are separate national lists for English, American, Belgian (including Dutch and Flemish), Celtic,

French, German, Greek (ancient and modern), Hungarian, Latin, Scandinavian, Slavonic, Spanish, Yiddish, and non-European fiction. Each important list is divided into periods and the authors of each period listed alphabetically. The foreign books included are in English translations, whenever possible. SYNOPSES

Synopses of well-known books, plots of novels, dramas, etc., are often asked for by readers. In some cases, as when college or high school students ask for synopses to save the trouble of reading the whole of some assigned work, the librarian may need to exercise some discretion as to whether or not the material should be supplied, but as other requests will be legitimate a general reference collection needs to include some aids for such questions. Good synopses will be found in several of the author dictionaries listed on p. 136-41 and briefer outlines are given in such works as Brewer's Reader's hand book, Baker's Historical fiction and Best fiction, etc. Critical works, or reviews, often give an outline of the works criticized, and some encyclopedias, especially the Grand dictionnaire of Larousse give many outlines. For special collections of synopses of operas and dramas, see those headings, p. 120 and 145.

Grozier, Edwin Atkins. One hundred best novels condensed, ed. by Edwin A. Grozier, assisted by Charles E. L. Wingate and Charles H. Lincoln. N. Y. Harper, 1920. 4 v. ports. 19^{cm}. \$5. **808.3**

Synopses, which are of some length, about 1,200-1,500 words each, are made by different persons, whose names are given. Originally published in *Boston Post*, as result of a prize competition for the best synopses.

ROMANCES AND EPICS

British museum. Catalogue of romances in the Department of manuscripts in the British museum. Lond. Pr. by order of the trustees, 1883-1910. v. 1-3. 26^{cm}. v. 1-2, o. p. v. 3, 10s. **016.8**

v. 1-2, by H. L. D. Ward; v. 3, by J. A. Herbert.

"In the present catalogue it is proposed to give a precise account of the MS. sources of Romance in the British Museum. Its scope is not limited to

a description of those works which by their connection with the various cycles or by their own construction can claim the title of Romances, but it also embraces a larger class of literature which more or less directly has to do with the subject. . . .

"Taking into account also the bibliographical and literary information with which the descriptions are accompanied, and the critical analysis to which the different texts have been submitted, it is hoped that the Catalogue may serve not only as a guide to the Museum collection, but also, to some extent, as a handbook to the subject." *Preface.*

The most important reference book in English on the subject. For each romance it gives, in addition to the description of the manuscript in the British museum, some account of the tale, its outlines, different versions, other manuscripts, authorship, history, etc., and important bibliographic references both to printed texts and to critical comment.

To be completed in four volumes; the fourth will contain additional romances and a general index.

Gives synopses of the stories of the great Dutch, English, Finnish, French, German, Greek, Italian, Latin, Portuguese, Scandinavian, and Spanish epics.

DRAMA

Reference books on the drama are needed for finding (1) biographies of dramatists or actors; (2) the author's name when only the title of a play is known; (3) outline of the plot, list of characters,

date and place of production, etc., of a given play; (4) information as to where text of plays not separately published may be found; (5) dramatic criticisms, etc.

In addition to the special reference books noted below, certain sections in some of the more general reference books are useful. The subject-index volumes of Lorenz, *Catalogue général* (see under Bibliography, p. 214) give, under the heading *Théâtre-Pièces isolées*, title lists of all French plays separately published since 1840. The index volumes of Kayser's *Bücher-lexikon* give similar lists of German plays under the heading *Theaterstücke*; earlier German lists are given as supplements, under the heading *Schauspiele*, in each volume of Heinsius' *Bücher-lexikon*, 1700-1827. These lists answer questions both of authorship and of publication. Printed library catalogs which contain many title and analytic entries are useful. The catalogue of the Milwaukee public library enters plays under title as well as author and indexes many sets and collections. The Library of the Peabody institute in both its first and second catalogs gives under the heading Drama an author and also a title list of single plays with references to collections in which they may be found.

Clarence, Reginald. "The Stage" cyclopædia; a bibliography of plays. An alphabetical list of plays and other stage pieces of which any record can be found since the commencement of the English stage, together with descriptions, authors' names, dates and places of production, and other useful information comprising in all nearly 50,000 plays and extending over a period of upwards of 500 years. CLASSICS

The various classical dictionaries described under History, p. 187, are important reference books for many questions about topics and names in Greek and Latin literature. Sandy's Companion to Latin studies, and Whibley's Companion to Greek studies should also be used. For description of both of these see under History, p. 188. The following bibliographies are important:

BIOGRAPHY

Dictionaries of biography are among the most important and most used reference books in any collection, and even a small library will need several books of this class. There are three main types of biographical dictionaries: (1) general, (2) national or regional, (3) special classes, *e. g.* artists, musicians, etc. Each of these

classes may, in turn, be divided as (1) general or retrospective, *i. e.* not limited to any period, and (2) contemporary.

In examining biographical dictionaries, test them for the points enumerated in the general instructions for examining reference books (see Introduction p. vii), and in addition note carefully whether there is any evidence of what is called the "commercial" character about the book. Unscrupulous publishers will sometimes include padded or unduly eulogistic articles on comparatively unknown persons, with the expectation, or on condition, that persons thus written up will subscribe for the book. The inclusion of such articles puts the book in the "commercial" class and casts doubt upon the authority of all articles. Such books are not necessarily to be rejected if they happen to be the only ones in their particular field, but they must always be used with caution, and they have no critical value.

GENERAL

Thomas, Joseph. *Universal pronouncing dictionary of biography and mythology*. 4th ed. rev. Phil. Lippincott, 1915. [c1870-1915] 2550 p. 27^{cm}. \$12. **920.01**

The most frequently useful of the general biographical dictionaries in English. Comprehensive, includes men and women of all nations and periods, including many still living; names from the Greek, Roman, Teutonic, Sanskrit and other mythologies are also included. Articles in general are brief, though there are some long articles, pronunciation is marked and there is some bibliography, though this feature is not important. Appendices: (1) Vocabulary of Christian (or first) names, with pronunciation, and equivalents in the principal foreign languages; (2) Disputed or doubtful pronunciations.

The 4th edition though revised so as to include considerable new material is not reset but is printed from the plates of the 3d edition (1901) with alterations in some of the older articles to bring them to date, omission of some minor articles, and inclusion of new names.

A dictionary of the "title a line" type; gives brief information, *i. e.* only full name, characterizing phrase and dates of birth and death. Includes no names of personages still living.

Biographie universelle (Michaud) ancienne et moderne. Nouv. éd., publiée sous la direction de M. Michaud, rev., cor. et considérablement augm. d'articles omis ou nouveaux; ouvrage rédigé par une société de gens de lettres et de savants. Paris. Mme. C. Desplaces, 1843-65. 45 v. 27^{cm}. o. p. **920.01**

Usually cited as Michaud.

The first ed., in 84 vols. including supplements, was published 1811-57, and the issue of the new ed., revised and enlarged, was begun in 1843, but its publication was interrupted in 1852 by a law suit undertaken by Mme. Desplaces, its publisher, against the firm of Didot frères, which had started a rival dictionary, the *Nouvelle biographie universelle ancienne et moderne*, ed. by Hoefer, and had incorporated in the first two volumes of the work 336 articles taken unchanged from Michaud and 69 taken with only slight alteration, besides others evidently based on Michaud. After various decisions and reversals the suit was finally won by Mme. Desplaces in 1855, Didot was forbidden to copy any more and the publication of Michaud was resumed. The Didot dictionary, under a changed title (see below) and without the pirated articles, was also continued. For an interesting account of this famous suit see the *Quarterly review*, 157: 204-26.

The most important of the large dictionaries of universal biography, still very useful in spite of the fact that the articles are now more than 50 years old. While Michaud and the rival work by Hoefer cover much the same ground, there are definite and well recognized differences. Michaud is more carefully edited, its articles, which are signed with initials, are longer and often better than those in Hoefer, its bibliographies (except in one point) are better and it contains more names in the second half of the alphabet, N-Z. Hoefer contains more names, especially minor ones, in the part A-M, has some articles which are better than the corresponding articles in Michaud, and in the bibliographies gives titles in the original whereas Michaud translates into French.

Garollo, Gottardo. Dizionario biografico universale. Milano. Hoepli, 1907. 2 v. 16^{cm}. L. 18. **920.01**

Gives only brief information, but useful because it includes a larger proportion of Italian names than other general biographical dictionaries.

Nouvelle biographie générale depuis les temps les plus reculés jusqu'à nos jours, avec les renseignements bibliographiques et l'indication des sources à consulter; publiée par MM. Firmin Didot frères, sous la direction de M. le Dr. Hoefer. Paris. Firmin Didot, 1853-66. 46 v. 23^{cm}. o. p. **920.01**

Begun in 1852 under the title *Nouvelle biographie universelle*; title later changed to *Nouvelle biographie générale*. There are three editions of v. 1-2: (1) edition with title *Nouvelle biographie universelle ancienne et moderne*, containing the 405 pirated articles from Michaud; (2) edition with title *Nouvelle biographie universelle depuis les temps les plus reculés*, with those articles omitted; (3) edition with title *Nouvelle biographie générale*. This last is the one usually found in libraries.

This work was planned to be more concise and more comprehensive than Michaud, to include names of people then living, and many minor names omitted in Michaud. It does include more names in the first part of the alphabet. For other points of comparison see note under *Biographie universelle*.

Arranged alphabetically, giving under each name (1) brief biographical data, *i. e.* characterizing phrase and dates of birth and death, and (2) references to books, periodicals, society transactions, etc., where some account of the personage may be found. The most complete and important work in this field, very useful for out of the way names, or for complete lists of references on more familiar names; less useful for quick reference work on more familiar names, because too much material is given for the ordinary reader. NATIONAL
AMERICAN

There is, unfortunately, no American dictionary of national biography of the first rank. The nearest approach is Appleton's Cyclopædia of American biography, but this, though a reliable and serviceable work as far as it went, was never from the point of view of either authority and length of articles or amount of bibliography, in the same class as the English Dictionary of national biography.

Appleton's cyclopædia of American biography; ed. by J. G. Wilson and John Fiske. N. Y. Appleton, 1888-1900. 7 v. illus. ports. 28^{cm}. o. p. **920.07**

Contents: v. 1-6, A-Z, suppl. A-Z, analytical index; v. 7, suppl. A-Z; Pen-names, nicknames, sobriquets; List of deaths in v. 1-6; Signers of the Declaration of Independence, Presidents of the Continental congress, Presidents, vice-presidents, unsuccessful candidates for those offices, cabinets, 1789-1897; analytical index to v. 7.

"Includes names of native and adopted citizens of the U. S., including living persons, from the earliest settlement. Also eminent citizens of Canada, Mexico, and all other countries of North and South America. Also names of men of foreign birth who are closely identified with American history." *Preface.*

On the whole, the best of the general American biographical dictionaries. Contains generally accurate and fairly long articles, little bibliography, many portraits, principally small but clear cuts in the text, and many facsimiles of autographs. A peculiarity of arrangement to be remembered is that under each family name arrangement is not alphabetical, but by seniority in the family. The analytical index is useful for subjects and for names not treated separately.

The above is the original edition and is the one recommended for libraries.

An edition entitled "Cyclopedia of American biography, new enl. ed. of Appleton's cyclopedia of American biography . . ." (N. Y., Press assoc. compilers, 1916. 6 v. \$75.) is printed from the same plates as the original edition with the omission of some of the older articles, the inclusion of some new articles and the addition of a supplementary list at the end of each volume. Two supplementary volumes to this edition, numbered as v. 8-9, are sold separately (\$10. each). These are non-alphabetical.

National cyclopædia of American biography. N. Y. White, 1892-1921. v. 1-17 in 18. illus. ports. 27^{cm}. \$10 per vol. **920.073**

Articles are not of a very high order but the entire work includes a great many names and is therefore useful, especially for names not given in

Appleton. Includes living personages. Not arranged alphabetically, so must be used through the index; v. 14-17 are supplementary volumes published 1910, 1914-16, 1918-20, and not indexed in the Conspectus noted below.

Issued in several editions, or printings, which vary somewhat, later issues showing some additions and rearrangements. Numbering of volumes is somewhat irregular, *i. e.* in some sets 14 is suppl. v. 1. and in others v. 14, and two different volumes numbered as v. 15 have been issued, one in 1914 and the other 1916. The first v. 15 is not found in all sets. A revised ed. of v. 2, showing some changes, omissions and additions was published 1921.

—A conspectus of American biography; being an analytical summary of American history and biography, containing also the complete indexes of the National cyclopædia of American biography; comp. by George Derby. N. Y. White, 1906. 752 p. 27^{cm}. \$10. **920.073**

Contains both a personal and a topical index to v. 1-13 of the above, and in addition the following chronological lists: Delegates to the colonial congresses, Presidents and vice-presidents, Cabinets, Candidates for presidency, Senators, Congressmen, Ambassadors, Heads of government departments, Judiciary, Presidents of religious organizations, College presidents, Bishops of the Protestant Episcopal church, Roman Catholic hierarchy, Bishops of other denominations, Presidents of scientific societies, Directors of astronomical observatories, Commanders of army and navy in war, of G. A. R., U. S. Commissioners, Founders of religious sects, Public statues in the U. S. Pseudonyms and sobriquets, Notable sayings, etc.

The personal index is not absolutely complete and accurate, and must sometimes be supplemented by indexes in the separate volumes.

Now sold by Oxford university press as follows: main work and 1st suppl., reissue on thinner paper, 1908-09, 22 v. 330 s. (N. Y. Branch \$148.50); 2d suppl. reissue in 1 v., 36s., \$16.20; Index and epitome, and Index and epitome, 2d suppl., bound together, 28s., \$14.40.

The most important reference work for English biography, containing signed articles by specialists, and excellent bibliographies. Articles are adequate, *i. e.* important names treated at great length, minor names more briefly, and are generally reliable and scholarly. Scope includes all noteworthy inhabitants of the British Isles and the Colonies, exclusive of living persons; includes noteworthy Americans of the colonial period. The first supplement includes biographies of those omitted from the main part and of those who died before Jan. 22, 1901; the second supplement carries the record

to December 31, 1911; the entire work includes 30,935 biographies. The index and epitome serves a double purpose, *i. e.* it is both an index to the main work and the first supplement, and also an independent biographical dictionary, as it gives abstracts, each about one-fourteenth of the length of the original article.

The main work and first supplement are published in two editions, the original edition in 66 volumes, and a re-issue, 1908, on slightly thinner paper, compressed into 22 volumes. This reprint incorporates in the articles the corrections noted in the volume of Errata and is, to that extent, to be preferred to the original edition. Libraries buying the work now are recommended to purchase the reprint, but libraries having the original edition and the volume of Errata do not need the reprint.

In 1917 the heirs of George Smith, founder and publisher of the dictionary, presented the work to the Oxford University press, to be continued by that institution. A supplement for 1912-21 is planned, but the only definite result (to 1922) of the transfer has been the reissue on thin paper and in one volume of the 2d supplement. As this has been done without repaging and without the amount of revision given to the reissue of the main work and 1st supplement, the Press has been criticized in print by Sir Sidney Lee. For his letter, *see* London Times literary supplement, Oct. 14, 1920, and London Times, 23 Nov., 1920, p. 8; For reply by secretary of the Press, *see* London Times, 17 Nov. 1920, p. 8.

FRENCH

There is unfortunately no general dictionary of French national biography as yet. A Paris firm, Letouzey et Compagnie, has announced the preparation of such a dictionary and this, if it is of the same grade and on the same scale as the religious encyclopedias issued by the same firm (see Baudrillart, Cabrol, etc., under Religion, p. 61) will be of the first importance. No parts of the projected work have yet been published. For French biography, then, recourse must be had to the general French encyclopedias, to the general biographical dictionaries of French origin, such as Hoefer and Michaud, and to the French local biographical dictionaries which, fortunately, are numerous and good although not all up to date. Lists of these local or regional dictionaries are given in *La grande encyclopédie* 6: 894-95, and in Stein's *Manuel de bibliographie* p. 501-07. The following more special works are also of importance:

Haag, Eugène. *La France protestante; ou, Vies des protestants français qui se sont fait un nom dans l'histoire depuis les premiers temps de la réformation jusqu'à la reconnaissance du principe de la liberté des cultes par l'Assemblée nationale.* Paris, Genève, Cherbuliez, 1846-59. 10 v. 24^{cm}. o. p. **920.044**

There is a later edition of which only v. 1-6 were ever published.

COLLEGE GRADUATES

A type of biographical dictionary of considerable importance for names either omitted altogether from the more general works, or included there with only brief information, is the biographical catalogue, general catalogue, or alumni list, of the graduates of a given college or other institution. Famous examples of this type are the Oxford and Cambridge lists noted below. The Yale series is perhaps the best

American example. For other American titles consult "A check list of biographical directories and general catalogues of American colleges and universities" compiled by Eva Alice Cole and printed in the New York Genealogical and biographical record for January, 1915.

GEOGRAPHY

There are four principal types of reference books which are useful in answering questions in geography: (1) gazetteers, both general and special, which serve to

tell where a given place is and furnish descriptive information about it; (2) dictionaries of place names, which indicate the origin and meaning of such names and the different forms which have been in use at different times; (3) atlases, which supply maps and through their indexes aid in the location of places; (4) guide books which supply a different type of descriptive material from that given in the gazetteers and contain many maps, especially local maps and town plans, not given in the general atlases.

ANNUAL

Geographen-kalender, herausg. von Hermann Haack, 1903-14. Gotha, Perthes, 1904-14.* v. 1-12. maps. 14^{cm}. M. 8 per vol. **910**

Contains for each year a calendar, geographic chronicle, discoveries, geographic literature and address lists as follows: A, persons prominent in geographic work or in allied subjects; B, geographical, geological, anthropological and ethnological societies, museums, etc.; C, periodicals; D, publishers. In later volumes, all address lists are not repeated each year, *e. g.* list A is given in v. 11, B-D in v. 12; for full information, therefore, the two latest volumes must be used together.

Publication suspended since 1914.

A useful classified bibliography, with alphabetical author index. Very full annotations, each signed.

Selected bibliographies, as well as many maps and useful reference data, are given in "The new world, problems in political geography," by Isaiah Bowman (Yonkers, N. Y., World book co. 1921. 632 p. \$6.). A helpful discussion of geographical bibliographies will be found in "Aids to geographical research: Bibliographies and periodicals" by J. K. Wright, American geographical Society, Research series no. 10 (in press).

GAZETTEERS

GENERAL

Lippincott's new gazetteer; a complete pronouncing gazetteer or geographical dictionary of the world, containing the most recent and authentic information respecting the countries, cities, towns, resorts, islands, rivers, mountains, seas, lakes, etc., in every portion of the globe; ed. by Angelo Heilprin and Louis Heilprin. Phil. Lippincott, 1906. 2053 p. 28^{cm}. \$12. **910.3**

The most complete and useful of the American gazetteers. Includes in one alphabet names of cities, towns, rivers, mountains, lakes and other geographical features, and gives for each the pronunciation of its name, information about other names by which the place was known, location, altitude, etc., and, in the case of towns, population figures, and brief information about local industries, finances, history, educational and other institutions,

etc. Entry is under the present form of the place name (in English), with cross references from ancient, mediaeval or other early forms or foreign forms.

This work is usually sufficient for all ordinary gazetteer questions. For out-of-the-way places omitted from this work or for fuller information than that given here, the large foreign works or the special local gazetteers must often be consulted.

1st ed. 1855. The latest revision is the 1906 ed. described above, and is now out of date for all places affected by the European war. The 1911 ed. is a reprint of the 1906, with the addition of a supplement, p. 2055-2105, entitled "Conspectus of the 13th census of the United States" which gives 1910 population figures for American states, counties, cities, towns, villages, etc. The 1922 ed. is also a reprint of the 1906, with a similar conspectus which gives both the 1910 and the 1920 figures.

—Supplément. Paris, Hachette, 1895-1900. 2 v. 32^{cm}. 74 fr., bound. **910.3**

The most complete and important of the general gazetteers. The longer articles are by specialists and are of a high grade, information is much fuller than that given in either Lippincott or Chisholm and many names are included, especially minor European or Asiatic names, which are not given in the American and English works. Not now up to date and so less useful for ordinary questions than Lippincott, but more useful than that work when very detailed or out-of-the-way information is needed.

Great Britain

Johnston, James B. Place-names of England and Wales. Lond. Murray, 1915. 532 p. 23^{cm}. 18s. **910**

The first comprehensive dictionary of English place names, including some 5,000 names with explanation of their derivation and references to sources. Contains much useful information not accessible in any other one book, but is not always accurate in its etymologies, especially for Welsh names. For comment on this point see review by Henry Bradley in *English historical review*,

As v. 3 does not duplicate many of the names in v. 1-2, use must still be made of the earlier volumes.

Volume 3 (1914) is a supplementary volume which lists

the titles added to the collection since 1909 and contains also a minute alphabetical index and an author list, this latter including references to volumes 1-2, also, and forming a complete checklist to the whole collection of some 4,000 atlases. Volume 4 is another supplement which lists titles acquired 1914-20 and contains an index and a combined author list for the 4 volumes. GUIDE BOOKS

The "guide-books" prepared for the use of travelers are very useful in a reference department as they are fuller for certain kinds of local information than either the general or the special gazetteers and give more local maps, plans of cities, etc., than are given in the ordinary atlases. They are especially useful for information about the art museums, collections, etc., of any given place, its architectural and historical monuments, scenic features, railroad and other communications, etc. Good guide books are (1) the Baedeker series published in both English, French and German editions (English, Lond. Unwin, N. Y. Scribner); (2) the Murray series (Lond. Murray, N. Y. Scribner); (3) the Blue guides (Guides bleues) published in Lon-

don by Macmillan and in Paris by Hachette; (4) the Guides Madrolle (Paris, Hachette) a French series including only a few titles but covering some subjects not included by Baedeker or Murray; (5) the Terry guide books, a more recent series (Bost. Houghton), including so far only two titles, Mexico and Japan; (5) an extended French series, the Guides Joanne which includes, especially, many local French guide-books (Paris, Joanne); this series was the predecessor of the "Guides bleues" and is being merged in that new series; (6) Official guide to eastern Asia, published by the Imperial Japanese government railways, a recent series in five volumes covering Manchuria and Chosen, Japan (2 v.), China, and the East Indies, and supplying both detailed information and many interesting illustrations (v. 1-5, 1913-17).

The dictionaries listed above are the best authorities in English and are satisfactory for ordinary questions. The best foreign classical dictionaries are, however, superior to anything in English and should be used for scholarly reference work, for very detailed information, for full bibliographies, especially for reference work for graduate students in university libraries. The best foreign works are the French dictionary of Daremberg and Saglio and the German Pauly-Wissowa, both listed below. These two differ in scope but are about equal in authority.

Daremberg, Charles, and Saglio, Édouard. Dictionnaire des antiquités

grecques et romaines. Paris, Hachette, 1873-1919. 5 v. and index. illus. 32^{cm}. 270 fr., bound 15 fr. extra per vol. **913.38**

v. 1-5, A-Z; separate index vol., 166 p.

A work of the highest authority, with long signed articles by specialists and very detailed bibliographical references. Covers in general the field of public and private life, manners and customs, institutions, arts, sciences, industries, religion, costume, furniture, military affairs, money, weights and measures, etc. Does not include biography and literature. Indexes of authors, Greek words, Latin words, and subjects.

Pauly, August Friedrich von. Pauly's real-encyclopädie der classischen altertumswissenschaft; neue bearbeitung, unter mitwirkung zahlreicher fachgenossen hrsg. von G. Wissowa. Stuttgart, Metzler, 1894-1920. v. 1-10, 2d ser. v. 1, and 3 suppl. v. illus., maps, fold. tab. 24^{cm}. M. 34 per vol., suppl. M. 18. **913.38**

v. 1-10, A-Katochos, 2. reihe v. 1, S-Sarmarthen; suppl. 1-2, 1903-13; 3, A-Iuglandem.

Generally cited as Pauly-Wissowa.

The two works by Sandys and Whibley are prepared on the same plan and similarly arranged. Each consists of a series of articles, by specialists, on topics of importance to the student of Greek and Roman history and literature, such as geography, ethnology, flora, science, chronology, coins, ships, buildings, population, slavery, etc. Articles are adequate, with useful bibliographies, and each volume has four indexes: (1) persons, deities and races. (2) places, rivers and mountains, (3) scholars and modern writers, (4) Latin (or Greek) words and phrases. Very useful as supplementing the various classical dictionaries.

In addition to the above the worker in the university or large reference library will often need to refer to Ivan Müller's Handbuch der klassischen altertums-wissenschaft (Nördlingen. Beck), a series of scholarly treatises on subjects in classical literature, antiquities, etc.

Much important reference material is to be found in the reports, bulletins and other publications issued by the various national, state, and municipal governments. These publications which are generally known as "government publications" or "public documents" cover topics in nearly the whole field of knowledge, but are most important for subjects in the fields of social and political science, economics, finance, labor, industry, statistics, education, history, etc., and in certain sciences such as agriculture, ethnology, geology, meteorology, etc., to the study and promotion of which certain government bureaus or commissions are devoted. No extended reference work can be done in questions of labor conditions in America, or American geology, for example, without the use of some of the publications of the United States Bureau of labor of the United States Geological survey.

Public documents are popularly supposed to be difficult to use and understand, and reference workers often fail to make the best use of such material because its difficulty is overrated. The only difficulty is that documents are published in complicated forms and sets and must be used through the printed catalogs, bibliographies and indexes provided for the purpose, but so used the United States documents for the periods covered by modern indexes are no harder to use than periodical literature which has to be found through periodical indexes. The reference worker should, therefore, become thoroughly familiar with the important document indexes. State and municipal documents are somewhat harder to use because less well provided with indexes.

UNITED STATES PUBLIC DOCUMENTS

CATALOGS AND INDEXES

General

U. S. Superintendent of documents. Checklist of United States public documents, 1789-1909. 3d ed. rev. and enl. Wash. Govt. print. off., 1911. v. 1, 1707 p. 24^{cm}. **015.73**

v. 1, Lists of Congressional and departmental publications.

"The first systematic attempt to include within the limits of one publication an approximately complete checklist of all public documents issued by the United States government during the first century and a quarter of its history."—*Preface*.

A checklist, not a catalog, covering Congressional documents through the 60th congress, and department and bureau publications to the end of 1909. Lists: (1) American State papers, (2) Congressional documents, 15th-60th congresses; (3) Department publications arranged alphabetically by government author.

The list of departmental publications gives, for periodical publications, a statement of the volumes and dates which constitute a complete set and the serial numbers if the publication is contained also in the serial set; for separate publications the full title and date are given and the serial number if the document appears also in the serial set. The preface contains a list and description of previous indexes and catalogs of U. S. documents. This edition replaces the 2d ed. of the *Checklist* and the tables of the *Tables and index*, but does not yet supplant the index of the *Tables and index*. An index volume is to be published later.

—Tables of and annotated index to the congressional series of United States public documents. Wash. Govt. print. off., 1902. 769 p. 29^{cm}. free. **015.73**

In two parts: (1) Tables of the documents of the 15th to the 52d congress, inclusive, arranged by serial numbers; (2) Minute alphabetical subject index to those documents. The first part is now superseded by the more complete tables in the 3d edition of the checklist, noted above, but the subject index is still very useful as a key to the contents of the congressional set before 1893.

Early period to 1881

Greely, Adolphus Washington. Public documents of the first fourteen congresses, 1789-1817. Papers relating to early congressional documents. Wash. Govt. print. off., 1900. 903 p. 23^{cm}. (U. S. 56th Cong., 1st sess. Senate. Doc. no. 428) **015.73**

—[Supplement.] Wash. Govt. print. off., 1904. **015.73**

Reprinted from the Annual report of the American historical association, 1903, v. 1, p. 343-406.

Poore, Benjamin Perley. Descriptive catalogue of the government publications of the United States, September 5, 1774-March 4, 1881. Comp. by order of Congress. Wash. Govt. print. off., 1885. 1392 p. 30^{cm}. [U. S. 48th Cong., 2d sess. Senate. Misc. doc. no. 67] **015.73**

Arranged chronologically, with general index. For each document gives full title, author, date, where the document may be found, and a brief abstract of the contents. Contains much valuable material but is difficult to use for quick reference because the index is not sufficiently complete, detailed or specific.

1881-1893

Ames, John Griffith. Comprehensive index to the publications of the United States government, 1881-1893. Wash. Govt. print. off., 1905. 2 v. 29^{cm}. (58th Cong., 2d sess. House. Doc. no. 754) **015.73**

Paged continuously.

The Comprehensive index, 1889-93, by J. G. Ames, published in 1894, is superseded by this work.

Bridges the gap between Poore's Descriptive catalogue, and the first volume of the Document catalogue.

Arranged in three columns. In the first is given the author of the document or department by which it is issued; in the second, an alphabetical list of documents arranged by subjects and titles; in the third, reference is made to the congress, session, the volume of the series in which each is embraced, and the number of the document. A personal index is added.

A good usable index, though less minute and detailed than the Document catalogue. Indicates the different editions in which a document was issued and gives serial numbers in a table under the heading Congressional documents.

1893-1921

U. S. Superintendent of documents. Catalogue of the public documents of Congress and of all departments of the government of the United States for the period, March 4, 1893, to June 30, 1915. Wash. Govt. print. off., 1896-1918. v. 1-12. 28^{cm}. **015.73**

v. 1, 53d congress; dept. publications, March 4, 1895-June 30, 1895; v. 2, 54th congress, 1st session; dept. publications, July, 1895-June, 1896; v. 3, 54th congress, 2d session; dept. publications, July, 1896-June, 1897; v. 4-12, 55th-62d congress, dept. publications, July, 1897-June, 1915, each volume covering one congress and the dept. publications of two years, July-June.

The "comprehensive index" provided for by the act approved Jan. 12, 1895.

This index, which is generally referred to by its binder's title as the "Document catalogue," forms the permanent and complete catalog of all government publications both congressional and departmental for the period covered. It is a dictionary catalog in form, listing all documents under author (government or personal), subject, and, when necessary, title also, and giving full catalog information for each book or pamphlet included. Includes a large amount of analysis, refers to all editions in which a document has appeared, and gives serial numbers for documents in the serial set, as follows: in v. 1-4, serial numbers are given only in the table under the entry "Congressional documents"; beginning with v. 5 serial numbers are given also throughout the list under the main (*i. e.* author) entry for each document, but not under the analytic entries. As far as issued supersedes the Document index and the Monthly catalogue (see below).

—Index to the subjects of the documents and reports, and to the committees, senators, and representatives presenting them (being the Consolidated index provided for by the act of Jan. 12, 1895), 54th cong. 1st sess.—66th cong. 3d sess. Wash. Govt. print. off., 1897-1922. v. 1-30. 23^{cm}.

015.73

An alphabetical author and subject index to the documents included in the serial set; does not cover bureau or department publications which are not included in the serial set. Each volume, as a general thing, covers one session of congress, but in a few cases one volume covers two sessions. Each volume contains: (1) alphabetical index, giving for each document indexed, brief title and a reference to its document number and to the volume of the congressional series in which it is included; (2) numerical lists, arranged by document numbers, of Senate reports, House reports, Senate documents, House documents, with indication of the serial number of each; and (3) schedule of volumes, giving the serial number of each volume. Only the later volumes are constantly used as the earlier volumes are superseded for ordinary reference purposes by the more complete Document catalogue.

—Monthly catalogue United States public documents, 1895-1921. Wash. Govt. print. off., 1895-1921. 23^{cm}. 50 cts. per yr. foreign 75 cts. **015.73**

From 1895 to 1906 inclusive the title was Catalogue of United States public documents, issued monthly.

A current bibliography of all publications issued by all branches of the government, including both the congressional and the department and bureau publications. Each number contains (1) general instructions for ordering documents, (2) a preface calling attention to the more noteworthy documents of the month and (3) list of the documents published during the month arranged by departments, with indication, for each publication, of its full title, date, paging, price, Library of Congress card number, etc. There is a detailed author and subject index for each volume which makes it possible to use the list both as a bibliography and as an index to the subjects of the documents included. Volumes run July-June, and only the volumes since 1915 are needed for constant use, as the earlier volumes are superseded for most purposes by the Document catalogue. Prefaces omitted in later volumes.

—Price lists. Wash. Govt. print. off. nos. 1-70. 23^{cm}. **015.73**

Includes no material not already included in the more general indexes noted above, but presents the same material in a different arrangement and grouping which is sometimes more convenient for quick reference. Gives prices, indicates material still in print, and sometimes supplies annotations which are useful.

"This index undertakes to deal only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages for the period since 1789. It does not refer to constitutions, laws, legislative proceedings or court decisions, except in so far as they happen to be found in the class of documents above mentioned. It attempts, on the other hand, to furnish a list, as complete as possible, of all the documents and messages which fall within its scope, in whatever form they have been published, whether separately, in collected documents, legislative journals or volumes of laws, and to indicate the volume in which they may be found. In addition to furnishing a list of reports and messages, the index undertakes to supply a reference by volume and page to all material of economic importance which they contain, with the exception of that contained in the reports of bureaus of labor before 1912. The reason for this exception is that these reports have already been indexed by the late Carroll D. Wright, when United States Commissioner of Labor, in a volume published by his department in 1902." *Preface.*

The word economic has been interpreted very liberally to include almost any aspect of American history. Indexing is by rather general headings and broad subjects.

U. S. Library of Congress. Division of documents. Monthly list of state publications. 1910-21. Wash. Govt. print. off., 1910-21. v. 1-12. \$1. per year. **016.3539**

A current bibliography, arranged alphabetically by the names of states, of the publications of the

states, territories and insular possessions of the U. S. Though limited to the publications received by the Library of Congress the list is approximately complete, as the Library of Congress aims to acquire all such material issued. Each title is given with full cataloging information, including very detailed contents in the case of composite reports. The full annual index includes references to these contents notes as well as to the main titles, so the list can be made to serve as a subject index as well as a bibliography.

The titles noted above represent the principal general bibliographies and indexes of state publications. There are, besides, many bibliographies of the publications of individual states, and of certain kinds of state publications, such as statutes, etc. These lists vary greatly in character, completeness and reference value, but are often useful, especially in the case of states not yet included in Miss Hasse's indexes. A list of such bibliographies is given in Reece's *State documents for libraries*, p. 112-28.

BRITISH DOCUMENTS

Great Britain. Parliament. House of Commons. General alphabetical index to the bills, reports, estimates, accounts, printed by order of the House of Commons and to the Papers presented by command, 1801-1909. Lond. Stationery off., 1853-1912. 5 v. 32^{cm}. v. 1-3 o. p. v. 4, 15s., v. 5, 4s. **328.424**

The volumes are not numbered.

Contents: [v. 1] General index to the accounts and papers, reports of commissions, etc., 1801-52; [v. 2] General index to bills, 1801-52; [v. 3] General index to reports of select committees, 1801-52; [v. 4] General index, 1853-99; [v. 5] General index, 1900-09.

An index to the English documents included in the Parliamentary papers of the House of Commons, not including the papers of the House of Lords except in so far as these are duplicated in the Commons papers and not including the "official" (*i. e.* the bureau or departmental) publications. Is arranged alphabetically by rather large subjects, and does not include many analytic entries, in both respects being much less detailed than the American indexes. Gives fairly full information about each paper, however, including its full title, date, and bill, document or command number, and a reference to the year and volume of the sessional papers in which it is to be found, and to the paging as made up for the House of Commons set. Some of the subject entries in the volumes before 1850 are rather blind but the later indexes are well made,

accurate and usable, except where minute analysis is called for. Continued by the following:

—Lists of the bills, reports, estimates and accounts and papers printed by order of the House of Commons and of the Papers presented by command, sessions 1910-1917-18, with a general alphabetical index thereto. Lond. Stationery off., 1911-21.* 8 v. 32^{cm}. 2s. 1d. per vol. **328.424**

Index for 1910 is v. 113 in the *Parliamentary Papers* for 1910; Index for 1911 is v. 114 in the *Papers* for 1911; Index for 1912/13 is v. 123 in the *Papers* for 1912/13; Index for 1913 is v. 82 in the *Papers* for 1913; Index for 1914 is v. 102 in the *Papers* for 1914; Index for 1914/16 is v. 85 in the *Papers* for 1914/16; Index for 1916 is v. 35 in the *Papers* for 1916; Index for 1917/18 is v. 39 in the *Papers* for 1917/18.

Each volume contains: (1) a preliminary list showing the make-up of the set for that session, (2) numerical lists of (a) bills, (b) accounts and papers, (c) command papers; and (3) general alphabetical index. This last is the main list in each volume, is compiled on the same plan as the cumulated indexes, and forms the annual index which is to be used until superseded by a new cumulated volume.

Publisher varies.

v. 1, 1801-59; v. 2, 1859-70; v. 3, 1871-85.

After 1885 the annual indexes must be used. Price 2s. per volume.

Gt. Brit. Stationery office. Monthly [and Quarterly] list of parliamentary publications (with prices and postage affixed) issued by H. M. Stationery office. Lond. Pr. for H. M. Stationery off. by Harrison, 1915-21. 24^{cm}. **328.424**

A current bibliography which taken together with the similar list of Official publications noted below corresponds in a general way to the U. S. Monthly catalogue. Cumulates quarterly, the cumulations having the title "Quarterly list," and the last cumulation of the year forming an annual list which as it has a fairly detailed alphabetical subject index furnishes a usable substitute for the regular annual index noted above, until the latter is published. Includes both House of Commons and House of Lords papers. Gives prices. Continued after 1921 by the "Consolidated list" described below.

Non-official selected lists including the more important papers, diplomatic correspondence and reports of commissions and select committees. Of use to those who wish to purchase separate documents, but not useful as an index to the Parliamentary Papers as volume numbers are omitted. Contains useful contents notes.

By P. Deschamps. A supplement to Brunet's *Manuel*, forming volume 9 of that work in some sets.

Brunet's *Manuel* is a general bibliography of rare, important, or noteworthy books not limited to those of any one period or language but especially strong for French and Latin titles and for publications before the 19th century. For each book listed it gives author, full title, place, publisher, date, size, number of volumes, but not generally paging, and, in the case of rare books, bibliographic and critical notes with mention of copies and prices at famous sales and occasional facsimiles of title pages, printers' marks, etc. The arrangement of the main work (v. 1-5) is alphabetic by authors and titles and there are two subject indexes, one in v. 6 to the main work and one in v. 8 to the supplement. Foot notes throughout v. 1-5 refer to titles omitted from the main author list but included in the subject volume (v. 6).

Covers much the same ground as Grässe's *Trésor de livres* but is generally said to contain a larger proportion of French books while Grässe lists more German titles. The two books must often be used together as each lists titles not given in the other.

It is based on Brunet, but contains more entries of German books; prices that books brought at sales are given.

Described under English bibliography.

General bibliographies are never complete and must frequently be supplemented by more special works, especially by national bibliographies and by the printed catalogs of large libraries. Printed catalogs, such as the book catalogs of the British museum and the Bibliothèque Nationale (see p. 230), and the depository card catalog of the Library of Congress, are especially important, partly because they serve to locate copies of rare books and partly because, as their entries are made only upon examination of the books listed, they are more free from certain types of error than general bibliographies in which some entries have been transcribed from other records without actual examination of the books themselves. General bibliographies on the other hand, often give fuller descriptions and annotations.

Binder's title: Church catalogue. 150 copies printed.

A monumental work, the finest catalog of Americana yet published although less frequently useful than either Sabin or Evans because of the limited number of titles included. Includes 1385 entries of books about America, arranged chronologically, from the earliest period to 1884, by date of publication with alphabetical author and title index. Gives for each book listed full title and collation, and very important historical and bibliographical annotations, with notes of differences in copies and location of copies in other libraries, referring in all to some 50 public and private libraries. Chic. Privately printed for the author by the Blakely press, 1903-15. v. 1-8. 29^{cm}. \$15 per vol. 015.73

v. 1, 1639-1729; v. 2, 1730-1750; v. 3, 1751-1764; v. 4, 1765-73; v. 5, 1774-78; v. 6, 1779-85; v. 7, 1786-89; v. 8, 1790-92.

The most important general list of early American publications, indispensable in the large reference or special library. Includes books, pamphlets, and periodicals, arranged chronologically by dates of publication; gives for each book listed, author's full name with dates of birth and death, full title, place, date, publisher or printer, paging, size, and, whenever possible, names of libraries possessing copies. Each volume has three indexes: (1) authors, (2) classified subjects, (3) printers and publishers. The location of copies is an especially important feature.

Sabin, Joseph. Dictionary of books relating to America, from its discovery to the present time. N. Y. Sabin, 1868-92. v. 1-19. A-Simms, and parts 115-116 (Simms to Smith) 22^{cm}. o. p. **016.973**

Half-title: *Bibliotheca Americana*, by which title it is generally known.

An important bibliography of Americana, including books, pamphlets and periodicals printed in America, and works about America printed elsewhere. Comprises more than 82,000 numbered entries, but the actual number of titles recorded is much greater as that total does not count the added editions and titles mentioned in the various notes. The arrangement is by authors, with some title entries for anonymous works and other entries under names of places, and the information given includes full title, place, publisher, date, format, paging, often contents and bibliographical notes with reference to a description or review in some other work and, in many cases, names of libraries possessing copies. This last feature is important for inter-library loans.

Unfortunately for a long time discontinued in the middle of the letter S, but now being completed by Mr. Wilberforce Eames.

United States catalog; books in print January 1, 1912; ed. by Marion E. Potter and others. 3d ed. White Plains, N. Y. Wilson, 1912. 2837 p. 32^{cm}. \$36. **015.73**

1st edition, 1900; 2d edition, 1903; supplement to 2d edition, covering years 1902-05, 1906. Edited by Marion E. Potter and others.

A thoroughly revised and much enlarged edition based upon information collected anew, not transferred from existing lists except for 1910-11 publications, the entries for which are transferred from the Cumulative book index 1910-11. Forms an approximately complete record of books published in the U. S. which were in print January 1, 1912, including books published in the regular book trade, privately printed books and publications of smaller publishers, importations of some firms, books issued by some Canadian publishers, university, society and state publications, and publications issued by the following U. S. departments, etc.:—Dept. of agriculture, Dept. of commerce and labor, Bureau of education, Geological survey, Public health and marine hospital service, Library of Congress, Smithsonian institution, National museum, Bureau of American ethnology, Pan American union, National monetary commission; and all U. S. publications included in the various bibliographies of the Supt. of documents published before 1911. Books listed in the Cumulative book index since 1906 but now out of print are also included but marked o. p. The information given about each book includes author's name, short title, edition, date, publisher, price and generally paging. The L. C. numbers are also given. The full subject cataloging and the many title entries are of decided reference value

for the purpose of identifying a book when the author's name is not known. Directory of 3,000 publishers includes the principal American firms and some English firms with information as to their American agents. Very few inaccuracies in proportion to the extent of the work.

—Supplement, 1912-17. N. Y. Wilson, 1918. 2298 p. 32^{cm}. \$48. **015.73**

—Supplement, Jan. 1918-June 1921. N. Y. Wilson, 1921. 2185 p. 26^{cm}. \$24. **015.73**

Supplements to the main work described above, on the same general plan but, in general, with fuller information, *i. e.* full title, paging, size, illustrations, binding, edition, date, publisher, price, L. C. card number, and occasional contents or other notes.

Indispensable for order department work, as an adjunct to the library catalogue, and as a reference tool for many subjects: verification of titles, authors' names and dates, questions of authorship when only title is known, lists of books on a given subject, etc. Subject lists of fiction *i. e.* Ghost stories, sea stories, detective stories, etc., and the use of the subhead fiction under many subjects *e. g.* European war-fiction, are useful in answering various types of reference questions on the subject of fiction.

General lists, such as those listed above, can not be absolutely complete, and must often be supplemented, especially for local literature, by local or regional bibliographies, such as the Bibliography of Virginia, by E. G. Swem, published by the Virginia State Library (Richmond, 1916-17, 2 v.), Bibliography of Maine, by Joseph Williamson (Portland, 1896, 2 v.). Pacific Northwest Americana, a checklist, by C. W. Smith (N. Y., Wilson, 1921), and other books of this type.

Special numbers issued during the year are: Spring announcement number in March, Summer number in May, Fall announcement number in September, Christmas number in November.

Publishers

Publishers' trade list annual, 1873-1921. N. Y. Publishers' weekly, 1873-1921.* 26^{cm}. \$5 per vol. **015.73**

A collection of publishers' catalogues, arranged alphabetically by publisher's name, and bound up in one large volume. As the catalogues are not compiled on any uniform system, the amount of information given about books varies greatly, ranging from full information and occasional notes in some lists to only short title and price in others; in general dates of publication are omitted. Lists only books in print, and so is primarily useful for finding quickly the price of a book and whether or not it is in print. Corresponds in general to the English "Reference catalogue" (see p. 213), but differs from that work (1) in being issued annually, and (2) in not having an index regularly. Only two indexes were issued, as follows:

—Index by author, title and subject catch-word to the books catalogued in the publishers' lists of 1902; ed. by A. H. Leyboldt. N. Y. Publishers' weekly, Aug. 1902. 1104 p. 26^{cm}. \$5 o. p. **015.73**

—Supplementary index, 1903-04. N. Y. Publishers' weekly, 1904. 483 p. 26^{cm}. \$3. **015.73**

Auction

American book-prices current, a record of books, manuscripts and autographs sold at auction in New York, Boston and Philadelphia, 1895-1920. N. Y., Dutton, 1895-1920.* v. 1-26. 22^{cm}. Price varies, v. 26 \$20. **018.3**

Publisher varies: v. 1-14, Dodd, Mead & Co.; v. 15-19, Dodd and Livingston; v. 20-23, R. H. Dodd.

v. 1-20, ed. by Luther S. Livingston, v. 21-22 ed. by Victor Hugo Paltsits.

v. 1 arranged chronologically by date of sales, v. 2-26, alphabetically by authors and some titles, in two lists, (1) printed books, periodicals, etc., (2) manuscripts and autographs; volumes 1-10 have subject indexes.

Information given varies somewhat, but from v. 11 on includes author, title, edition, place, date, size, binding, condition, sale, name of auctioneer, date of sale, lot number in original auction catalog, price. Includes books of all periods and languages and is of importance in reference work not only as a record of market prices of second-hand books but also as a supplement to the general and national bibliographies, as it not infrequently includes titles or editions not listed in such bibliographies. In case of rare books location of the copies sold can sometimes be traced by applying to the auctioneer, and the giving of the lot number in the original sales catalog furnishes a clue to a fuller and sometimes important description.

Livingston, Luther Samuel. Auction prices of books; a representative record arranged in alphabetical order from the commencement of the English Book-prices current in 1886 and the American book-prices current in 1894, to 1904, and including some thousands of important auction quotations of earlier date. N. Y. Dodd, 1905. 4 v. 26^{cm}. o. p., pub. at \$40. **018.3**

Aims to include every important book selling above \$5 or £1 at English and American sales. States binding, special features, name of sale, owner or auctioneer, date of sale, number in original sale catalog, price.

Useful for a partial record, and for quick reference, but not up to date for present values.

First Editions

Foley, P. K. American authors, 1795-

1895; a bibliography of first and notable editions. Bost. 1897. 350 p. 27^{cm}. \$5.

015.73

Compiled from the point of view of the collector; arranged alphabetically by authors, with brief notes but no prices. There is a list of initials, pseudonyms, and anonymous books appended.

Stone, Herbert Stuart. First editions of American authors; a manual for book-lovers. Camb. [Mass.] Stone, 1893. 233 p. 17^{cm}. \$1.25. **015.73**

Gives dates of first editions; no prices.

The above are serviceable general lists. For important questions special bibliographies of individual authors should always be consulted, if possible, as they are usually more detailed and accurate than the general lists.

The standard French list for the 19th and 20th centuries and one of the most important of modern national bibliographies. Covers French publications by periods ranging from three years to 25 years, the volumes for each period consisting of (1) a main author and title list containing full information, *i. e.* author's full name, full title of book, edition, place (if other than Paris) date, publisher, paging, size, price, and occasional brief notes and (2) a subject

list arranged by broad subjects, with briefer information *i. e.* title, author, size, date and price only. Includes books, pamphlets, some theses and annuals but not periodicals, and lists some Belgian and Swiss publications, *i. e.* books in French published in Belgium or Switzerland but handled regularly by some French firm also. Special features are: (1) the inclusion of brief biographical notes about the authors whose works are listed, (2) the linking together of all entries for the same author by cross-references from the later to the earlier volumes, (3) the occasional brief notes which tell whether a book has been crowned by the French Academy, refer in case of reissues or later editions to date of first edition and in case of books or pamphlets reprinted from periodicals, give reference to volume or date of the periodical, etc. The information about original publication in periodicals is often very useful.

Gives full titles and bibliographic notes, original price, and, often, prices realized at various auction sales.

v. 1-2 list the bibliographies published before 1905; v. 3 is a supplement containing about 10,000 additional references principally to bibliographies published since 1905.

An important and useful handbook. Arranged alphabetically by the subjects, of the bibliographies listed; refers not only to bibliographies in book form, but also to lists in periodicals and to other analytic material, including occasionally even articles which contain bibliographic information but are not formal bibliographies.

Contents: (1) Universal bibliographies; (2) National and regional bibliographies; (3) Subject bibliographies. Appendices contain: (1) Alphabetical list of places having printing presses before the 19th century, arranged by the modern names, with indication of the Latin name of each place, the date of establishment of its press, and references to sources of information; (2) List of indexes of periodicals in all languages; (3) List of printed catalogues of libraries.

There is a useful subject index, but no author index. As the subject index includes the Latin names of places listed in apx. 1, it serves also as a dictionary of Latin and mediaeval geography.

The main list and appendices 2-3 are kept to date by the lists of new bibliographies, indexes and catalogues given in each number of *Le bibliographe moderne*, edited by Henri Stein.

—Index to reference lists published by libraries, 1907-08, 1909, 1910-date. (See Bulletin of bibliography, 5: 125-26, 149-52, Oct. 1908-Jan. 1909, 5: 74-77, April 1910, and each January number beginning with January 1911.)

Monthly reference lists compiled by the Providence public library were also printed in the A. L. A. booklist Dec., 1905-Jan., 1908. Quarterly lists compiled by the same library were printed in the Bulletin of bibliography Oct., 1899-Oct., 1906. Most of these quarterly lists were superseded by the

Bulletin of bibliography pamphlet noted above but the earlier numbers must still be used to bridge part of the gap between that pamphlet and Mrs. Nachtmann's list.

Each volume contains a section "Bibliographies of the year" arranged alphabetically by subjects, which serves as an annual bibliography of bibliographies. This section, which was a feature also of the two earlier publications, Annual literary index and Annual library index, includes both separately published bibliographies and analytic material.

Another annual which records new bibliographies is the *Bibliographie des bibliotheks- und buchwesens*, which is especially useful for its notes of new foreign bibliographies. For description see under Periodicals-Special indexes, p. 11.

CHOICE OF BOOKS

For a discussion of the principles of book selection and of the importance of the right selection of books consult E. L. Bascom's Book selection. Chicago, A. L. A. pub. board, 1915; preprint of A. L. A. Manual of library economy, chapter 16. This is an excellent discussion from the point of view of the librarian. Various lists of "the world's greatest books" chosen by teachers, writers, etc., are printed from time to time. The value of these depends upon the judgment and literary taste of the compiler. Certain lists which have been given wide circulation should be kept at hand for ready reference. One of the most frequently quoted of these short lists is President Charles W. Eliot's "Five foot book shelf." This has been often printed,

and may be found for example in the *Outlook*, 92: 426*, and in the pamphlet "Harvard classics" issued by Collier's weekly. The following bibliographies are among the most useful of the longer lists of good books:

Sonnenschein, William Swan. Best books; a reader's guide to the choice of the best available books (about 100,000) in every department of science, art and literature, with the dates of the first and last editions, and the price, size and publisher's name (both English and American) of each book, a contribution towards systematic bibliography. 3d ed. (entirely rewritten). N. Y. Putnam, 1910. pt. 1-2. 24^{cm}. \$3.50 each. **019**

Eng. ed. Routledge, 14s. each.

Pt. 1, classes A, Theology; B, Mythology and folklore; C, Philosophy; Pt. 2, classes D, Society; E, Geography, ethnology, travel and topography. To be completed in three parts.

1st edition 1887; 2d edition 1891; supplement to 2d edition, entitled *Readers' guide*, 1895.

The standard long list.

To be obtained from the Superintendent of documents, Washington, D. C. Pt. 1, classed; pt. 2, dictionary.

A. L. A. Catalog, 1904-1911. Class list, 3,000 titles for a popular library; ed. by Elva L. Bascom. Chic. A. L. A. pub. board, 1912. 350 p. 26^{cm}. \$1.50. **019**

Supplement to A. L. A. Catalog, 1904.

Contents: (1) Class list; (2) Books in A. L. A. Catalog, 1904, now out of print; (3) Books in A. L. A. Catalog, 1904, now issued in new editions; (4) Subject index, author index.

Both the main work and the supplement are useful in a library for many purposes, for example, (a) as a guide in selecting books on any subject because the selection was made by many experienced librarians, and because the brief annotations are often helpful; (b) as an aid in ordering because the publisher's name and price are given and because care was exercised in the selection of editions; (c) in classifying books; (d) in the selection of subject headings; (e) in ordering printed catalog cards from the Library of Congress, because the card numbers are given. Planned especially for the

public library but useful also in other types.

A new supplement to be issued.

A previous A. L. A. catalog was published in 1893, entitled *Catalog of "A. L. A. Library,"* 5,000 volumes for a popular library (Wash. Government printing office.).

"The main purpose of the *A. L. A. Booklist* is to aid public libraries in book buying; its secondary aim is to give assistance in cataloging and classifying to librarians whose training or experience is limited."

A monthly guide which gives carefully selected lists of recent publications in general literature, fiction, children's books, U. S. government documents, and new editions of older works. Before 1915 the general list was an alphabetical author list but after that date it is a classified list arranged by the Dewey D. C. numbers. For each book included the Booklist gives author's full name, title, place, publisher, date, paging, price, L. C. card number, D. C. class number, suggested subject headings and a careful critical note which estimates the value of the book, compares it with other works and indicates kind of library for which it is recommended.

To the latter they are useful for verification of titles, descriptions of books and editions, information about authorship, contents, etc., analytic and other added entries not given in the library's own catalog, occasional notes, location of copies, etc. Dictionary and subject catalogs are also helpful in finding lists of books about subjects.

v. 1-74, A-Hunzinger.

An important modern catalog, the value of which, to either the cataloger or the reference worker in the large library, can not be overestimated. An alphabetical author catalog, including only entries under names of personal authors, with the necessary cross references; does not include title entries for anonymous books or entries for anonymous classics, periodicals or society transactions or government or corporate authors. The cataloging is excellent, the information given includes author's full name, supplied whenever possible, title, place, publisher, date, edition, paging or volumes, format, and occasional notes of contents, original publication in case of reprints from periodicals, etc. An important reference feature in the case of authors whose works are voluminous or often reprinted is the detailed alphabetical title index under the author's name, which indicates in what volumes or editions a given work may be found; as these indexes include also alternative and changed titles they are often very useful.

SUGGESTIVE LIST OF 100 REFERENCE BOOKS

The following list is suggested as an aid to the smaller public library which, from funds often too limited to secure more than a few of the most essential reference works, finds the question of selection more difficult than the large library with its larger needs and larger income. It is a suggestive, not an absolute list, as no two libraries, of even the same size, have exactly the same needs, and their selection of reference books must be influenced by the character of the community,—whether urban, rural, industrial, educational, etc.—the proportion and nature of the foreign language element in the library clientèle, proximity to other libraries or sources of information, with the possibility of telephone or inter-library loan aid, the amount and kind of material already available in the non-reference collection, etc. Certain basic works, a dictionary, an encyclopedia, an atlas, a biographical dictionary, a book of quotations, a handbook of statistics, a state or government manual, are needed everywhere, but the selection, and especially the order of purchase, of other works will often be modified by the local conditions and demands.

This suggestive list gives brief title only; for fuller information as to publisher, editions, prices, etc., reference should be made to the description in the main part of the Guide. As the selection is for American libraries primarily, the titles included are, in the main, those of American publications. In purchasing any book of which there are both English and American editions, any difference in price should be taken into account, and the librarian should also remember that especially in the case of reference books now absolutely new, money can often be saved by asking for quotations before purchasing, advertising for copies, or purchasing secondhand or at auction. Government publications can usually be obtained free, and the librarian who is building up a reference collection on very limited funds should take full advantage of that fact.
